Table of Contents

Introduction ..... **xxix**

Module I

Chapter 1: A Gateway to SAP **3**
- Architecture of SAP R/3 7
  - Component Service—Kernel and Basis 8
  - Component Service—ABAP Workbench 8
  - Component Service—Presentation 8
- SAP Integrated—Analysis, Implementation, and Design 8
- Three-Tier Architecture 10
  - Presentation Layer 11
  - Application Layer 11
  - Database Layer 12
- Why Multi-tier Architecture? 12
- Integrating Environments 12
- Conclusion 15

Chapter 2: SAP Easy Access **17**
- SAP User Menu 19
- The Client Concept 21
- SAP Settings 22
- Navigating in the Workplace Menu 24
  - Navigation Path 25
  - Navigating through Transaction Code 25
  - Getting Transaction Codes through History List 27
- Creating Favorites 27
  - Actions within Favorites 28
  - Inserting an Item 30
  - Inserting a Transaction 30
  - Managing Favorites 31
- Role of a User 32
  - Assigning User Roles 33

Function of a System Administrator ... 37
Creating Activity Groups ... 38
Conclusion ... 39
Chapter 3: SAP User Interface ... 43
SAP GUI ... 45
Screen Header ... 46
Screen Banner ... 47
Screen Body ... 47
The Menu bar ... 47
The Standard Toolbar ... 49
The Application Toolbar ... 51
The Status Bar ... 52
The Layout Menu ... 53
Table Controls ... 53
Creating Table Control Variants ... 54
Activating Table Control Variants ... 55
Handling Lists ... 55
Radio Buttons and Checkboxes ... 56
Choosing Options with Radio Buttons ... 57
Choosing Options with Checkboxes ... 57
Working with Dialog Boxes ... 57
Scrolling to View Information ... 58
Handling Multiple SAP Sessions ... 59
Creating a New Session ... 59
Creating a New Session and a Task in One Step ... 60
Moving among Sessions ... 61
Ending a Session ... 61
Conclusion ... 62
Chapter 4: Starting and Shutting the SAP System ... 63
Starting the SAP System ... 65
Logging into SAP ... 65
The SAP Logon ... 68
Adding a New Entry ... 69
Changing an Entry ... 70
Removing an Entry ... 70
Adding a New Logon User Group ... 70
Adding an Application Server ... 70
Configuring the SAP Logon ... 71
Password ... 72
Changing the Password ... 73
User Interface ... 74
Standard Toolbar ... 75
System Status Information ... 76

SAP Shortcuts 76
Creating a SAP Shortcut 76
Using SAP Shortcuts 78
With no SAP Session Running 78
With SAP Session Running 79
Session Manager 79
Logging off 79
Conclusion 80

Chapter 5: Handling Tasks in SAP 81

Accessing Task in a SAP System 83
Choosing Options from a Menu 83
Navigating SAP using Keyboard 85
Selecting Tasks Using Transaction Codes 86
Entering Data on a Screen 89
Fields Usage and Overview 90
Clipboard Usage 92
Required Input Fields 93
Holding and Setting Data 93
Saving the Data 94
Moving to Related Task 95
Ending a Task 95
Conclusion 95

Chapter 6: Reports in SAP 97

Opening SAP Reports 99
Report Execution 100
Executing a Report in Your Task 100
Tool-Based Reports 100
Accessing the Report by Name 102
Finding the Name of a Current Report 103
Selection Criteria 104
Entering Values for Selection Criteria 104
Multiple Selections 105
Variants in Report 105
Creating Variants for a Report 106
Displaying Available Report Variants 108
Using Report Variants 108
Listing Reports 109
Displaying Report Lists 109
Printing Options 110
The Print Screen 111
Following the Print Request 111
The Output Controller 112
Saving the Printer name 112
Printing Report 114

Conclusion 115

Chapter 7: Background Processing 117

Background Scheduling 119
Advantages of Background Processing 120
Scheduling Background Jobs 120
Processing Scheduling ABAP Jobs 122
Scheduling Standard Jobs 122
Identifying Your Job 124
Specifying a Recipient 125
Specifying ABAP Program to Run in Background 125
Options in Scheduling Background Jobs 126
Status of a Background Job 128
Policies for Background Processing 129
Task and Roles for Background Processing 130
Customizing Display Option in SAP 130
Configuring SAP GUI 130
Color Settings in SAP GUI 132
Customizing Sound and Animation 136
Setting the SAP Window 137
Switching Auto-Tabbing On or Off 138
Cursor Position and Width 138
Creating Screen Shots 139
Conclusion 140

Chapter 8: SAP System Administration Utilities 141

System Administration 143
Consistency Checks 143
Monitoring Instances and Application Server 143
System Work Processes 147
Examining User Sessions 150
Displaying System Messages 152
Managing Update Records 153
Update Process Concepts 153
Status of Update Work Processes 154
Monitoring Update Records 154
Common Update Functions 155
Troubleshooting 156
Client Information in SAP 158
Client Copy Functions' Tools 159
New Client Creation 159
Requirements for Creating Clients 162
Copying a Client 165
Deleting a Client 165
Client Copy Logs 165
Transporting Clients between SAP Systems 166
Copying Table Entries 167

The SAP System logs ... 167
The System Log Selection Criteria Screen ... 168
System Log Types ... 169
Displaying Log Report ... 170
Log Message Codes of Log Events ... 171
Utilities of System Log Environment ... 171
System Log Modes ... 172
Dump Files Generated by ABAP ... 173
Basic Tracing Utilities ... 173
System Trace Functions ... 174
Developer Traces ... 177
Conclusion ... 179

Chapter 9: SAP R/3 Basis System ... 181

The R/3 Position in the Basis System ... 183
Logical View ... 183
Software-Oriented View ... 184
Software-Oriented and Hardware-Oriented View ... 186
Advantages of the Multi-tier Architecture ... 186
Consequences for Application Programming ... 187
User-Oriented View ... 187
Application Servers ... 188
Structure of an Application Server ... 188
Components of Application Server ... 192
Structure of an Application Program ... 192
Screens ... 193
Screens ... 194
Selection Screens ... 194
Lists ... 195
Structure of ABAP Programs ... 195
Declaration Part for Global Data, Classes and Selection Screens ... 196
Declaration Part for Local Data in Processing Blocks ... 196
Container for Processing Blocks ... 196
Calling Processing Blocks ... 197
Program Types and Execution ... 197
Type 1 ... 198
Type M ... 199
Type F ... 199
Type K ... 199
Type J ... 200
Type S ... 200
Type I ... 200
Processing Blocks in ABAP Programs ... 200
Dialog Modules ... 200
Event Blocks for Selection Screens ... 201

Event Blocks for Lists ... 202
Event Blocks for Executable Programs (Reports) ... 202
Subroutines ... 203
Function Modules ... 204
Methods ... 204
ABAP Statements ... 205
Declarative Statements ... 205
Modularization Statements ... 205
Control Statements ... 205
Call Statements ... 206
Operational Statements ... 206
Database Statements ... 206
Data Types and Objects ... 207
Predefined and User-defined Elementary Types ... 207
Data Types for Reference ... 208
Declaring Data Objects ... 208
Memory Structures of an ABAP Program ... 209
Work Processors ... 210
Structure of a Work Process ... 211
Types of Work Process ... 213
Conclusion ... 215

Chapter 10: Understanding ABAP Workbench ... 217

Types in SAP System ... 219
Local and Global Types ... 219
Elementary Dictionary Types ... 220
Local Data Types in Programs ... 220
Data Objects ... 220
Rules for Naming Data Objects ... 221
Literals and Constants ... 221
Data Types and Data Objects ... 221
ABAP Dictionary ... 222
Database Objects in ABAP Dictionary ... 223
Type Definitions in ABAP Dictionary ... 224
Services of ABAP Dictionary ... 224
ABAP Dictionary Integration ... 225
Tables in ABAP Dictionary ... 226
Data Types Defined in ABAP Programs ... 228
Data Element ... 229
Key Definition ... 229
Key Type ... 229
Elementary Types ... 230
Structured Types ... 230
Table Types ... 230
Performance During Table Access ... 231
Buffer Synchronization—Advantages and Disadvantages ... 234

Internal Tables 234
Types of Internal Tables 234
Processing Single Records 235
Processing a Set of Records 236
Filling Internal Tables Line by Line 236
Internal Tables with Header Line 236
Conclusion 237

Chapter 11: Data Type and Tables in ABAP 239
Data Types 241
Existing Data Types 242
Mapping of the Data Types 244
Data Elements 245
Creating Data Elements 246
Documentation and Docu Status 247
Field Labels 248
Headers 249
Domains 249
Creating a New Domain 251
Changing Existing Domains 252
Deleting Domains 253
Views 253
Join, Projection and Selection 254
Inner and Outer Join 256
Foreign Key Relationship and Join Condition 257
Maintenance Status 258
Time-Dependent Key Components 258
Insertions with Database Views 259
Database Views 259
Includes in Database Views 260
Technical Settings of a Database View 260
Creating Views 264
Maintenance Attribute of a View Field 268
Delivery Class of a Maintenance View 269
Maintaining Selection Conditions of Views 269
Deleting Views 270
Search Helps 270
Standard Input Help Process 270
Functions of Search Help 271
Elementary Search Help—Its Structure 271
Structure of a Collective Search Help 273
Tables 275
Internal Tables 276
Table Fields 277
Reference Fields and Reference Tables 277
Includes 277

Foreign Keys ... 279
Technical Settings of Tables ... 280
Data Class ... 281
Size Category ... 282
Buffering Permission ... 283
Logging ... 283
Converting Pooled Tables to Transparent Tables ... 284
Buffering Database Tables ... 285
Indexes ... 287
Creating Tables ... 287
Creating Foreign Keys ... 289
Delivery Class ... 290
Activation Type ... 292
Making Changes to Tables ... 292
Adding an Append Structure ... 292
Inserting an Include ... 293
Inserting New Fields ... 293
Initial Values ... 294
Deleting Existing Field ... 295
Changing Data Types and Existing Field Lengths ... 295
Changing the Table Category ... 295
Moving Fields ... 296
Copying Fields from another Table ... 296
Copying Fields from an Entity Type ... 297
Deleting Tables ... 297
Conclusion ... 297

Chapter 12: The ABAP Programming Language ... 299

Program Types ... 303
Report Components ... 304
Program Runtime Objects ... 305
Programming Naming Convention ... 305
Types and Objects ... 305
All about Statements ... 309
The First ABAP Program ... 310
The select Statement ... 313
Work Area ... 315
Explicit Work Area ... 316
The where Clause ... 317
Working with System Variables ... 317
The Chain Operator ... 320
The select single Statement ... 321
Commenting Code and Formal Documentation ... 322
Modularization Technique ... 323
Events ... 323
Subroutines ... 324
Introducing Function Modules ... 331

Understanding Function Groups ... 332
Conclusion ... 333

Chapter 13: ABAP User Dialogs ... 335

Screens ... 337
Screen Elements ... 337
Processing Screens ... 342
Status Icons ... 343
Context Menus ... 345
Subscreens ... 352
Tabstrip Controls ... 357
Flow Logic ... 359
Handling in the ABAP Program ... 359
Custom Controls ... 363
Table Controls ... 368
Selection Screens ... 369
Function ... 369
Selection Screens—Defining and Calling ... 369
Defining Selection Screens ... 370
Calling Selection Screens ... 372
Calling Standard Selection Screens ... 372
Calling User-Defined Selection Screens ... 373
Lists ... 379
List Creation and Displaying ... 379
Lists Details and User Actions ... 379
Lists and Screens ... 379
Messages Handling ... 379
Message Management ... 380
Messages ... 380
The Message Statement ... 380
Message Processing ... 382
Message Types ... 382
Messages without Screens ... 382
Messages on Screens ... 383
Messages on Selection Screens ... 384
Messages in Lists ... 385
Messages in Function Modules and Methods ... 385
Macros ... 386
Subroutines ... 387
Defining Subroutines ... 388
Calling Subroutines ... 388
Function Modules ... 388
Function Groups ... 389
Calling Function Modules ... 389
Creating Function Modules ... 393
Include Programs ... 398

Creating Your Own Include Programs ... 399
Using Include Programs ... 399
Conclusion ... 400

Chapter 14: Running ABAP Programs ... 401
Programs Run Directly ... 403
Program Type 1 ... 403
Program Type M ... 404
Programs Run Indirectly ... 404
Program Type F ... 404
Program Type K ... 404
Program Type J ... 404
Program Type S ... 404
Program Type I ... 404
Programs Starting Directly in ABAP ... 405
Processing Blocks ... 405
Event Blocks ... 405
Dialog Modules ... 407
Reports—Running Programs Directly ... 407
Logical Database ... 408
Report Transaction ... 411
Executable Program Event Blocks ... 412
Dialog-Driven Programs ... 412
Overview of Dialog Programs ... 413
Maintaining Transactions ... 415
Screen Sequence ... 416
Calling Programs ... 417
Memory Organization ... 418
SAP LUWs and Program Calls ... 418
Calling Executable Programs ... 419
Calling Transaction ... 419
Calling Screen Sequences as Modules ... 420
Exchanging Data between Programs ... 422
Using Internal Memory Areas ... 422
Filling Input Fields on an Initial Screen ... 423
Modularization Techniques ... 425
Source Code Modules ... 426
Procedures ... 429
Conclusion ... 429

Chapter 15: ABAP Database Access ... 431
Accessing R/3 System's Database ... 433
SQL ... 433
Database Interface ... 433
Open SQL ... 434
Native SQL ... 435

ABAP Dictionary ... 435
Authorization and Consistency Checks ... 435
Open SQL ... 435
Return Codes ... 436
Client Handling ... 436
Reading Data ... 436
Changing Data ... 437
Inserting or Changing Lines ... 443
Performance Notes ... 444
DBMS Architecture ... 445
The Optimizer ... 446
Rules for Efficient Open SQL Programming ... 446
Native SQL ... 446
Native SQL Statements ... 446
Native SQL Scope ... 447
Stored Procedures ... 448
Cursor Processing ... 448
Data Types and Conversions ... 449
Logical Databases ... 450
Functionalities ... 451
Structural Analysis ... 452
Database Program ... 454
Using Logical Databases ... 456
Editing Logical Databases ... 457
Programming Database Updates ... 457
Transactions and Logical Units of Work ... 457
The R/3 Lock Concept ... 458
Update Techniques ... 460
Creating Update Function Modules ... 460
Calling Update Functions ... 461
Special LUW Considerations ... 461
Error Handling for Bundled Updates ... 461
Conclusion ... 462

Chapter 16: ABAP Object Orientation ... 463

Object ... 465
Classes ... 465
Object References ... 465
Uses of Object Orientation ... 465
ABAP Objects ... 466
The Runtime Environment ... 466
The Object-Oriented Language Extension ... 467
All about Classes ... 467
Local and Global Classes ... 467
Defining Local Classes ... 467
Class Structure ... 468

Object Handling 471
Objects 471
Object References 471
Creating Objects 472
Addressing the Components of Objects 472
Creating More Than One Instance of a Class 472
Assigning References 472
Lifetime of an Object 473
Declaring and Calling Methods 473
Declaring Methods 473
Implementing Methods 473
Calling Methods 474
Event Handler Methods 475
Constructors 475
Inheritance 476
Redefining Methods 476
Abstract and Final Methods and Classes 477
References to Subclasses and Polymorphism 477
Namespace for Components 477
Inheritance and Static Attributes 477
Inheritance and Constructors 478
Interfaces 480
Defining Interfaces 480
Implementing Interfaces 480
Interface References 481
Addressing Objects Using Interface References 481
Assignment Using Interface References—Casting 482
Triggering and Handling Events 483
Triggering Events 483
Handling Events 483
Conclusion 485

Chapter 17: ABAP Data Dictionary 487

Data Dictionary 489
The Relational Data Model 489
The ABAP Dictionary in R/3 System 490
Object Types in ABAP Dictionary 490
ABAP Dictionary–The Integration Factor 491
Starting the ABAP Dictionary 491
Tables in the ABAP Dictionary 491
What are Table Pools? 492
What are Table Clusters? 493
What are Table Fields? 495
Individual Fields and Includes 495
Working with Foreign Keys 496
Assigning Field to Foreign Key 496

Value Check and Check Field 497
What are Text Tables? 497
Technical Settings of a Table 498
Using Indexes 499
Appending Structures 499
Customizing Includes 501
What are Aggregate Objects? 501
Primary Table of Aggregate Object 502
View Types 502
What are Matchcodes ? 503
What are Matchcode Objects? 503
What are Matchcode IDs? 503
Creating Matchcodes 504
Creating Matchcode Objects 504
Lock Objects 508
Working with Data Utility 508
Editing Database Objects 509
Editing Tables and Indexes in the Database 509
Editing Pools and Clusters in the Database 510
Editing Matchcodes in the Database 510
Processing Types 512
Version Management in the ABAP Dictionary 512
Conclusion 513

Chapter 18: Batch Data Communication (BDC) 515
Data Transfer 517
Direct Input Method 518
Call Transaction Method 518
Batch Input Session Method 518
Data Transfer Overview 519
Call Transaction Method 522
Syntax of CALL TRANSACTION Method 523
Error Handling in Call Transaction Method 524
Recording Method (SHDB) 525
Conclusion 525

Module II: Materials Management (MM)

Chapter 19: Consumption Based Planning 529
MRP and Lot-Sizing Procedures 531
Reorder Point Planning 532
Forecast-Based Planning 533
Time-Phased Planning 533
Planning Run Intricacies 534
Lot-Sizing Procedure 535

The Parameter of MRP ... 536
Maintaining MRP Parameters ... 536
PPC Planning Calendar ... 537
How System Calculates the Order Quantity ... 537
The Forecast Parameter ... 538
Forecast Models ... 538
Model Selection ... 538
Model Initialization ... 538
Ex-Post Forecast ... 539
Parameter Optimization ... 540
Maintaining Forecast Parameters ... 540
Creating Historical Data ... 540
Creating Forecast Values ... 541
Maintaining Parameter Using Profile ... 541
Creating a Profile ... 541
Displaying a Profile ... 542
Changing a Profile ... 542
Deleting a Profile ... 543
The Forecast Procedure ... 543
Calculating the Forecast Values ... 544
Calculating the Safety Stock and the Reorder Level ... 544
Ex-Post Forecast ... 545
Monitoring the Selected Forecast Model ... 545
Forecast Result ... 546
Changing the Forecast Result ... 547
Carrying Out Planning Run ... 548
Options for Carrying out the Planning Run ... 548
System Functions in a Planning Run ... 549
Planning Result ... 549
MRP List ... 549
Displaying MRP Lists ... 550
Current Stock/Requirement List ... 550
Displaying and Processing the Stock/Requirements List ... 551
Planned Orders ... 551
Displaying Planned Orders ... 552
Maintaining the Planning File ... 553
Displaying Entries in the Planning File ... 553
Creating Entries in the Planning File ... 555
Planning File: Consistency Check ... 556
Forecast Formula ... 556
Moving Average Model ... 557
Weighted Moving Average Model ... 557
Principles of First-Order Exponential Smoothing ... 558
Constant Model with First-Order Exponential Smoothing ... 558
Trend and Seasonal Models with First-Order Exponential Smoothing ... 558

Second-Order Exponential Smoothing 559
Evaluating Forecast Accuracy 560
Safety Stock Calculation 561
Safety Stock (SS) Formulas 561
Reorder Level Calculation 562
Conclusion 562

Chapter 20: Purchasing 563
Simple Procurement Cycle 565
All about Quota Arrangement 566
Understanding Outline Agreement 566
Purchasing Customization 566
Procurement in MM 567
What's there in Purchasing Menu? 567
Functions in Standard Menu 568
What are Purchasing Documents? 568
Master Records from Purchasing View 570
Purchase Requisition 571
RFQ and Quotation 572
Structure of Request for Quotation 572
What is Quotation? 573
Creating RFQs 573
Changing RFQ and Displaying Change Log 574
Entering Prices 575
Order Price Unit (of Measure) 575
Entering Code for Taxes 575
Creating an Info Record 575
Rejecting Quotations 575
Monitoring RFQs and Quotations 576
RFQ Analysis 576
Understanding Purchase Order 577
Options under Purchase Order 578
Creating a Purchase Order 578
Handling Returns 579
Invoicing Plans 580
Changing, Cancelling, and Blocking Purchase Orders 581
The Purchase Agreement with Vendor 582
Structure of an Outline Agreement 582
Texts in Outline Agreements 582
All About Contract 582
What is Scheduling Agreement? 583
Purchasing Information Records 584
Conditions in Info Records 586
Creating Info Records 586
Optimized Purchasing 587
Determining Source 589

Release Procedure ... 591
Conclusion ... 592

Chapter 21: External Service Management (ESM) ... 593
Master Record from ESM View ... 597
Service Master Record ... 597
Master Conditions for Services ... 597
Standard Service Catalogue (SSC) ... 598
Model Service Specifications ... 599
The Process of Procuring Services ... 599
Basic Process ... 599
Service Specifications ... 603
Accelerated and Simplified Processes ... 603
Data Interchange ... 609
Description of Interface ... 610
Distribution of Service Master Records ... 611
Conclusion ... 612

Chapter 22: Inventory Management ... 613
Inventory Management Functions ... 615
Managing Stocks by Quantity ... 615
Special Stocks ... 615
Goods Movements ... 615
Integration of Inventory Management in the Logistics System ... 616
Features Integration in Materials Management ... 616
Integration in Production Planning ... 617
Integration in Sales and Distribution ... 617
Integration in Quality Management ... 617
Integration in Plant Maintenance ... 617
Integration in the Logistics Information System ... 617
Inventory Management and Warehouse Management System ... 617
Returnable Transport Packing ... 617
Structure of Special Stock Data ... 618
The Stock Type ... 618
Supported Goods Movements ... 618
Consignment Materials ... 618
Physical Inventory of Consignment Material ... 619
PipeLine Materials ... 620
Materials with Material Type PIPE ... 620
Other Material Types ... 620
Pipeline Withdrawal ... 620
Creating a Pipeline Material ... 621
Special Inventory Management Features ... 621
Customizing Inventory Management Features ... 621
Goods Movement ... 622
Structure of Goods Movement ... 622

The Document Concept ... 622
The Movement Type Concept ... 624
Changing a Material Document ... 624
Displaying a Material Document ... 625
Cancelling a Material Document ... 625
Goods Receipt ... 626
Planning Goods Receipts ... 626
Goods Receipts for Purchase Orders ... 627
Goods Receipts for Orders ... 628
Other Goods Receipts ... 629
Goods Issue ... 630
Goods Issues—General ... 630
Goods Issue With Reference to a Reservation ... 632
Goods Issue with Reference to an Order ... 632
Reversing a Planned Goods Issue ... 633
Return Delivery ... 633
Return Delivery via Shipping ... 634
Posting a Return Delivery with Reference to the Material Document ... 634
Posting a Return Delivery with Reference to the Purchase Order ... 634
Posting a Goods Receipt with Reference to a Return Delivery ... 634
Return Deliveries from Warehouse or Consumption ... 635
Return Deliveries from Goods Receipt Blocked Stock ... 635
Return Delivery in Goods-Receipt-Based Invoice Verification ... 636
Stock Transfer and Transfer Posting ... 636
Transfer Postings and Stock Transfers—General ... 636
Planning Stock Transfers and Transfer Postings Using Reservations ... 638
Stock Transfer from Plant to Plant ... 638
Entering a Transfer Posting from Stock to Stock ... 639
Reservation ... 639
Planning a Goods Issue ... 639
Creating a Reservation ... 640
Displaying a Reservation ... 641
Changing a Reservation ... 641
Managing Reservations ... 642
Physical Inventory ... 643
Physical Inventory Procedures ... 643
Physical Inventory Process ... 644
Carrying Out the Physical Inventory ... 645
Serial Numbers in Physical Inventory ... 645
Information on Physical Inventory ... 646
Batch Handling ... 647
Material Handling in Batches ... 647
Batch Determination ... 648
Stock Determination ... 648
Integration ... 649

Creating Stock Determination Strategies ... 650
Starting Stock Determination ... 651
Print Function ... 651
Archiving ... 651
Displaying Archived Documents ... 651
Archive Research with the Archive Information System (SAP AS) ... 652
Reporting in Inventory Management ... 652
Storing Documents ... 653
Conclusion ... 654

Chapter 23: Costing and Material Ledger ... 655

What is Actual Costing? ... 657
Multiple Currencies and Valuations ... 658
Activation Options ... 658
Price Determination ... 658
Single-Level Material Price Determination ... 659
Multi-level Material Price Determination ... 660
Transaction-Based Material Price Determination ... 661
Changing Material Price Determination ... 662
Material Ledger Data ... 662
Material Ledger Data Display ... 663
Material Listing as per Period Status ... 664
Prices and Inventory Values ... 664
Material Ledger Data over Several Periods ... 665
Material Transaction History ... 666
Material Ledger Document ... 667
Periodic Valuation of Material ... 668
Periodic Material Valuation: Single-Level Material Price Determination ... 669
Multi-level Actual Costing ... 669
Updating the Actual Quantity Structure ... 669
Costing Run ... 670
Price Changes ... 670
Debiting/Crediting Materials ... 672
Determining Future Prices ... 672
Releasing Planned Prices ... 673
Dynamic Release of Planned Prices ... 674
Changing Material Prices ... 674
Posting a Price Change ... 675
Price Change Document ... 675
The Structuring of Value Chains ... 676
Controlling Level ... 677
Procurement Processes ... 678
Procurement Alternatives ... 679
Installation—Material Ledger and Actual Costing ... 680
Checking Customizing for the Material Ledger ... 681
Checking Exchange Rates ... 681

Preparing Data for the Material Ledger (Production Startup) ... 681
Reconciling Accounts for the Material Ledger in Different Currencies and Valuation Categories ... 683
Authorizations—Material Ledger/Actual Costing ... 684
Conclusion ... 685

Chapter 24: Invoice Verification ... 687
Basic Invoice Verification in SAP ... 689
Methods for Invoice Verification ... 689
Logistic Invoice Verification ... 690
Working with Logistics Invoice Verification ... 691
Difference between LIV and Conventional Invoice Verification ... 692
Taxes, Cash Discounts and Foreign Currency ... 692
Taxes ... 692
Cash Discount ... 694
Foreign Currency ... 695
Variance Reasons ... 696
Blocking Reasons ... 696
Variances in an Invoice Item ... 697
Cash Discount and Blocked Invoices ... 699
Delivery Costs ... 699
Planned Delivery Costs ... 699
Unplanned Delivery Costs ... 700
Subsequent Debits/Credits ... 700
Posting Subsequent Debit/Credit ... 701
Credit Memos and Reversal ... 702
Credit Memos ... 702
Credit Memos that Refer to a Purchase Order or a Goods Receipt ... 702
Posting a Reversal Document ... 702
Cancelling Invoice Documents ... 703
Release Blocked Invoices ... 703
Selecting Invoices for Processing ... 703
Processing the List of Invoices ... 703
Releasing Invoices ... 704
Repercussions of Releasing Invoices ... 705
Invoice Verification in Background ... 706
Invoice Verification in the Background Without an Item List ... 706
Invoice Verification in the Background with an Item List ... 706
GR/IR Account Maintenance ... 707
Material Valuation ... 707
Control of Material Valuation ... 707
Agency Business ... 708
Conclusion ... 710

Chapter 25: Vendor Evaluation Systems ... 711
Levels in Organization Structure ... 715
Master Data ... 716

Vendor Evaluation Process ... 717
Overall Score ... 717
Main Criterion ... 718
Subcriterion ... 718
Scoring Range ... 720
Weighting of Scores ... 720
Calculating Scores by the System ... 720
Calculating the Overall Score ... 720
Smoothing of Individual Scores ... 722
Calculating Scores for Automatic Subcriteria ... 723
Calculating Scores for Semi-Automatic Subcriteria ... 724
Reports and Analysis in Vendor Evaluation ... 726
Generating Reports and Analysis ... 726
Conclusion ... 728

Module III: Sales and Distribution (SD)

Chapter 26: Master Data and Basic Functions ... 731
Organizational Structures in SD ... 733
Organizational Structures in Accounting ... 733
Organizational Structures in Material Management ... 733
Customers and Business Partners ... 734
Business Partners ... 734
Customers ... 734
Vendors ... 734
Personnel ... 734
Working with Customer Master Records ... 734
Structuring of Customer Master Record ... 735
Maintaining Customer Master Records ... 735
Creating a Customer Master Record ... 735
Changing a Customer Master Record ... 739
Displaying a Customer Master Record ... 740
Deleting a Customer Master Record ... 741
Customer Hierarchies ... 742
Customer Hierarchy Type ... 743
Account Groups in Customer Hierarchies ... 743
Maintaining Customer Hierarchies ... 744
Customer Hierarchies in Sales Order Processing ... 744
Partner Determination for Customer Hierarchy Nodes ... 745
Product and Services ... 745
Material Types ... 745
Industry Sectors ... 746
Sales and Distribution Screens in the Material Master Record ... 747
Grouping Materials ... 747

Units of Measure and Quantity Specifications ... 748
Delivering Plants ... 750
Item Category Groups ... 750
Agreements ... 750
Customer Material Information Records ... 750
Creating Customer Material Information Records ... 751
Item Proposal ... 751
Creating Item Proposals ... 752
Pricing and Condition ... 752
Material Determination ... 752
Creating Master Records for Material Determination ... 753
Material Listing and Exclusion ... 753
Creating Master Records for Material Listing and Exclusion ... 754
Partner Determination in Sales and Distribution ... 755
Using Other Components in Logistics ... 755
Using Financial Accounting (FI) ... 755
Using Human Resources (HR) ... 755
Partner Control ... 756
Partners in the Sales and Distribution Process ... 756
Texts in Sales and Distribution ... 757
Conclusion ... 758

Chapter 27: Condition and Pricing ... 759

Introduction to the Condition Technique ... 761
Condition Types ... 761
Condition Tables ... 763
Pricing Procedures ... 766
Sales Documents—Pricing ... 767
Pricing Elements ... 768
Prerequisites for Automatic Pricing ... 769
Pricing Screens ... 770
Header and Item Conditions ... 771
Header Conditions ... 771
Item Conditions ... 771
Displaying Header and Item Conditions ... 771
Manual Pricing ... 772
Implementing a New Pricing Procedure ... 773
Pricing Analysis ... 773
Condition Records ... 774
Organizational Level for Condition Records ... 774
Creating Condition Records with Reference ... 774
Maintaining Master Data Related to Pricing ... 775
Condition Maintenance Interface ... 775
Defining Pricing Scales ... 775
Basis of Pricing Scales ... 775

Procedure to Create Pricing Scales ... 776
Specifying Pricing Scale Types ... 776
Calculating the Scale Base Value: Group Conditions ... 776
Copying Condition Records ... 776
Different Copying Scenarios ... 777
Special Condition Record Functions ... 778
Terms of Payment ... 778
Tracking Cumulative Values with Condition Update ... 779
Maximum Value ... 779
Maximum Quantity ... 779
Maximum Number of Sales Orders ... 780
Special Pricing Functions ... 781
Promotional Pricing Agreements ... 781
Agreement Types in Promotional Pricing ... 781
Customer Expected Price ... 782
During Order Entry ... 782
System Reaction to Price Variation ... 783
Controlled through Pricing Procedure ... 783
Processing Sales Orders with Customer Expected Price ... 783
Data Determination in the Access ... 784
Condition Interchange ... 784
Examples of Inbound Processes ... 784
Examples of Outbound Processes ... 784
Pricing Information and Analysis ... 785
Pricing Analysis ... 785
The Pricing Reports ... 785
Net Price Lists ... 787
Conclusion ... 788

Chapter 28: Availability Check and Requirements ... 789

Availability in SD Process ... 791
Functionality ... 791
Types of Availability Check ... 791
Controlling the Check ... 794
Fixing Quantities and Dates in Sales Documents ... 797
Deferring Confirmation of Quantities in Sales Documents ... 797
Rescheduling of Sales Documents ... 798
Shortage Check ... 798
Displaying the Availability Situation in Sales Documents ... 799
Requirements in SD Processing ... 801
Functions ... 801
Types of Transfer of Requirements in Sales and Distribution Documents ... 801
Controlling the Transfer of Requirements in Sales and Distribution Documents ... 802
Displaying the Requirements/Stock Situation ... 802
Availability Check in Shipping ... 803
Functionality ... 803

Controlling the Availability Check in Shipping 804
Performing the Availability Check in Shipping 804
Availability Check against Product Allocation 804
Availability Check against Product Allocation during Order Entry SD 806
Display Availability Check against Product Allocation 806
Conclusion 806

Chapter 29: Credit and Risk Management 807
Credit Monitoring 809
Credit Control Area 810
Deriving the Credit Control Area 812
Setting Credit Limits 813
Creating Credit Data 813
Credit Data Processing 815
Sales and Distribution Functions in Credit Management 816
Sources of Information in Credit Management 816
Credit Management in Distributed Systems 818
Reports for Credit Management 820
Postings without Credit Limit Checks 822
Authorizations for Critical Credit Control Fields 822
Automatic Credit Control 822
Understanding Authorizations 823
Risk Management for Receivable 823
Settings for Credit and Risk Management 824
Conclusion 826

Chapter 30: Understanding Output 827
Output Types in SD 829
Creating Condition Records 830
Analyzing Output Determination 830
Processing Output 831
Worklist Selection for Output 831
Output Processing in Worklists 832
Output Processing in Documents 833
Output from Billing Documents 834
SD's Transmission Medium 834
Printing Output 834
Printing Output Manually 835
Sending Electronic Mails 835
Conclusion 836

Chapter 31: Sales Component in SAP 837
Sales Documents Categories 839
Basic Functions within Sales Order Processing 839
Flow in Sales Documents 839
Organizational Structure in Sales 840

Structuring Sales Document ... 840
Structure and Data in a Sales Document ... 841
Origin of Data in Sales Documents ... 844
Controlling Sales Document ... 847
Customer Inquiry and Quotation ... 848
Customer Inquiries ... 849
Customer Quotation ... 849
Sales Order ... 849
Standard Functions During Order Processing ... 850
Items in Sales Order ... 851
Delivery Times/Commitment Dates in Sales Orders ... 851
Sales Order Commitment Dates ... 851
Delayed Sales Order Indicator ... 852
Scheduling Agreements ... 852
Creating Scheduling Agreements ... 853
Packing Information—Scheduling Agreement ... 854
Displaying Scheduling Agreements ... 854
Contract Categories of Customers ... 855
Complaints ... 856
Processing Complaints ... 857
Backorder Processing ... 858
Selecting Backordered Materials from a List ... 858
Selecting Single Materials for Backorders ... 859
Special Business Process in Sales ... 860
Consignment Stock Processing ... 860
Returnable Packaging ... 864
Make-to-Order Production ... 866
Individual Purchase Orders ... 866
Bills of Materials in Sales Documents ... 867
Third-Party Order Processing ... 868
Batches in Sales Processing ... 870
Configurable Materials in Sales Documents ... 870
Internet Scenario ... 872
Sales Order Entry ... 872
Status of Sales Order ... 874
Conclusion ... 875

Chapter 32: Shipping and Transportation ... 877

Functions Supporting Shipping ... 879
Transportation of Goods ... 880
Delivery Processing ... 881
Picking ... 881
Functions under Picking ... 881
Picking with Warehouse Management ... 882
Wave Picks ... 882
Picking Status ... 883

Packing 884
Functions under Packing 884
Packing Deliveries 884
Automatic Packing in Shipping 886
Working with Freight Lists Use 886
Goods Issue 887
Functions under Goods Issue 887
Goods Issue Posting 888
Goods Issue from Consignment Stock 889
Displaying Goods Issue Documents 889
Proof of Delivery 890
Reversal of Goods Issue 891
Printing and Communication in Shipping 891
Editing Outbound Delivery Output 891
Editing Loading Output 892
Editing Shipping Unit Output 893
Delivery Interface 894
Material Label (Material Tag) 900
Planning, Analyzing, and Monitoring 901
The Delivery Monitor 901
Special Functions of Deliveries 902
Working with Batches 902
Working with Material Determination 903
Material Listing and Exclusion in Deliveries 903
Replenishment Deliveries 904
Serialization of Goods 905
Route Schedules 905
Transportation Planning 907
For Outbound Shipments 907
For Inbound Shipments 907
Using the Route as Selection Criterion 908
Shipment Completion 908
Activity Profiles 909
Shipment Monitoring 909
Using Information System in Transportation 909
Displaying Transportation Change Documents 910
Shipment Cost Processing 910
Constraints 912
Shipment Cost Document 912
Shipment Costing 913
Shipment Cost Settlement with Service Agent 913
Conclusion 915

Chapter 33: Reports and Analysis 917

Reports 919
Calling up Reports 919

List Processing ... 921
Find Function ... 921
Restricting List Function ... 922
Totalizing List Function ... 923
Sort in List Function ... 923
Choosing Display Variant Function ... 924
Choosing Individual Documents Directly from the List ... 924
Choosing Master Data ... 924
Choosing Additional Fields to Display More Information in the List ... 925
Defaults Setting before List Creation ... 925
Worklists ... 926
Sales Documents ... 926
List of Sales and Distribution Documents ... 926
List of Incomplete Sales and Distribution Documents ... 927
List of Unconfirmed Sales Documents ... 927
List of Backordered Sales Documents ... 927
List of Blocked Sales Document ... 928
Information on Individual Sales Document ... 931
Document Flow ... 931
Status Overview ... 931
Incompletion Logs ... 932
Functional Analysis ... 933
Pricing Analysis ... 934
Performing an Account Determination Analysis ... 935
Performing a Split Analysis ... 935
Billing Analysis ... 936
Output Determination Analysis ... 936
Sales Information System ... 936
Conclusion ... 937

Appendix A: Exploring mySAP ... 939

Appendix B: Glossary ... 945

Appendix C: Functional Buttons of SAP ... 973

Appendix D: Transaction Codes ... 999
