

CONTENTS

Chapter 1 ■ Getting Started with 3D and Maya 2008	1
Introduction	2
Workflow of 3D Content Development	2
Preproduction	3
Production	3
Postproduction	4
Installing Maya 2008	5
Starting Maya 2008.....	13
Exploring Maya 2008 User Interface	15
Main Menu Bar and Menu Sets	16
Status Line.....	19
Shelf.....	20
Tool Box	21
Workspace	22
Channel Box and Layer Editor.....	24
Attribute Editor	27
Outliner	28
Hotbox and Marking Menus	29
Time Slider and Range Slider	31
Command Line and Help Line	32
Displaying and Hiding the User Interface Elements.....	34
Exiting Maya 2008.....	36
Summary.....	36
Chapter 2 ■ Working with Scenes, Projects, and Objects	37
Introduction	38
Working with Projects and Scenes	38
Creating a Project.....	38
Creating and Saving New Scenes	40
Viewing the Workspace.....	44
Switching Between the Views	44
Dollying, Tracking, and Tumbling.....	47
Working with Objects.....	49
Polygons	50
NURBS	50
Lights	50
Cameras.....	50
Creating an object	51
Selecting and Deselecting Objects	53
Object Mode	54
Component Mode	55

Transformation of Objects.....	56
Grouping and Ungrouping Objects.....	64
Duplicating Objects.....	67
Working with Construction History.....	68
Summary.....	70

Chapter 3 ■ Polygon Modeling in Maya 2008 71

Introduction.....	72
Exploring the Components of a Polygon Mesh.....	72
Vertices.....	72
Edges.....	73
Faces.....	74
Face Normals and Vertex Normals.....	74
UVs.....	76
Creating a Polygon Mesh.....	76
Creating a Polygon Primitive.....	76
Using the Create Polygon Tool to Create a Polygon Mesh.....	80
Creating a Symmetrical Polygon Mesh.....	83
Modifying a Polygon Mesh.....	88
Combining and Separating Polygon Meshes.....	88
Making a Polygon Mesh Smooth.....	92
Duplicating a Face of a Polygon Mesh.....	98
Extracting a Face from a Polygon Mesh.....	100
Splitting a Face of a Polygon Mesh.....	101
Extruding a Face, Edge, and Vertex.....	110
Merging Multiple Vertices, Edges, and Faces.....	112
Bevelling an Edge.....	114
Chamfering a Vertex.....	116
Sliding an Edge on a Polygon Mesh.....	117
Deleting a Face, Edge, and Vertex of a Polygon Mesh.....	118
Summary.....	120

Chapter 4 ■ NURBS Modeling 121

Introduction.....	122
NURBS Curves.....	122
Degree of a Curve.....	122
Control Vertices.....	123
Edit Points.....	123
Hulls.....	123
Creating a NURBS curve.....	124
Using the CV Curve Tool.....	124
Using the EP Curve Tool.....	125
Using the Pencil Curve Tool.....	127
Editing a NURBS curve.....	128

Changing the shape of the curve	128
Inserting a knot (Edit Point) in a curve	129
Attaching and Detaching a Curve.....	131
Closing and Opening a curve.....	133
Extending a curve	136
Rebuilding a curve	137
Creating NURBS Surface	138
Using Curves to Create a NURBS Surfaces	138
Using NURBS Primitive to create a NURBS Surface.....	145
Editing a NURBS Surface	147
Inserting an Isoparms in a Surface	147
Attaching and Detaching a Surface	149
Opening and Closing a Surface.....	153
Extending a Surface	156
Rebuilding a Surface.....	160
Sculpting a Surface using the Sculpt Geometry Tool	162
Summary.....	164

Chapter 5 ■ Animating Objects in Maya 2008 165

Introduction	166
Types of Animation.....	166
Keyframe Animation.....	166
Path Animation.....	167
Driven Key Animation	167
Motion Capture Animation	167
Nonlinear Animation.....	168
Using the Animation Controls	168
Time Slider.....	168
Range Slider	170
Animating an Object Using Keyframe Animation	172
Setting a Keyframe.....	172
Editing a Keyframe.....	179
Using the Graph Editor	182
Adding Sound to an Animation	191
Previewing an Animation	193
Creating a Motion Trail.....	193
Ghosting an Animated Object.....	194
Playblasting an Animation	196
Summary.....	198

Chapter 6 ■ Shading, Texturing and Lighting 199

Introduction	200
Shader Types.....	200
Lambert Shader Type.....	201

Phong Shader Type.....	201
Blinn Shader Type	202
Phong E Shader Type.....	202
Anisotropic Shader Type.....	202
Layered Shader Type	202
Ramp Shader Type	203
Shader Attributes.....	203
Color.....	203
Transparency.....	204
Ambient Color.....	204
Incandescence	204
Diffuse	204
Glow Intensity.....	204
Raytrace Options.....	205
Specular Color.....	205
Reflectivity	205
Roughness, Highlight Size, and Whiteness	205
Hypershade.....	205
Work Area.....	206
Create /Bins Panel	206
Render Node Display Area	207
Using the Hypershade	207
Maya Lights.....	209
Common Light Attributes	209
Three Point Lighting.....	210
Key Light.....	210
Fill Light.....	211
Back Light	211
Light Types.....	211
Ambient Lights	212
Volume Lights	219
Adding Shadows	220
Shadow Map Method	221
Raytraced Method	221
Mental Ray Lighting.....	222
Caustics.....	223
Global Illumination (GI).....	223
Mental Ray attributes.....	223
Lightning Effects.....	224
Volumetric Lighting	225
Lens Flare.....	227
Shader Glow Effect.....	230
Summary.....	230

Chapter 7 ■ Rendering Scenes in Maya 2008		231
Introduction		232
Types of Rendering and Renderers		232
Using the Render Settings Window		233
Specifying the Image File Name		234
Specifying the Renderable Camera		236
Specifying the Image Size		237
Working with a Camera		237
Creating a Camera		238
Viewing the Scene through a Camera		240
Moving and Aiming a Camera		241
Framing a Scene		241
Making a Camera Renderable		243
Adding Depth of Field		243
Adding Motion Blur		247
Rendering a Scene Using Maya Software Renderer		250
Anti aliasing Quality		252
Field Options		253
Raytracing Quality		254
Motion Blur		255
Render Options		256
Memory and Performance Options		257
IPR Options and Paint Effects Rendering Options		258
Working with the Render View Window		258
Rendering Nodes		260
Texture nodes		261
Placement nodes		262
Material nodes		263
Working with Render Layers		263
Using the Mental Ray for Maya Renderer		266
Summary		269
