

Table of Contents

Introduction	xxi
Chapter 1: Introducing Visual Basic 2008	1
<i>In Depth</i>	2
New Features Introduced in Visual Basic 2008.....	2
Language Improvements in Visual Basic 2008.....	2
Compiler Changes and Options in Visual Basic 2008	6
Keywords.....	6
Visual Basic Statements	8
Statement Syntax.....	9
The Option and Imports Statements	10
The Option Statements	10
The Imports Statement	11
Namespaces.....	11
System Namespaces.....	12
Data Types.....	14
Variables and Constants	15
Declaring Variable.....	15
Constant Declaration	18
Data Type Conversion	19
Operators	21
Operator Precedence.....	23
Arrays.....	25
Standard Arrays	25
Dynamic Arrays	26
Enumerations	26
Strings	26
<i>Immediate Solutions</i>	28
Creating a Console Application.....	28
Using the Option Statement.....	29

Table of Contents

Using the Imports Statement.....	29
Creating Aliases for Namespace Classes.....	30
Declaring Variables and Constants	30
Converting Data Types.....	31
Creating Standard Arrays.....	32
Creating Dynamic Arrays.....	33
Creating Enumerations	33
Working with Strings.....	34
Using the Val and Str Functions	35
Commenting Your Code.....	36
Summary.....	36
Chapter 2: Flow Control and Exception Handling in Visual Basic 2008	37
<i>In Depth</i>	38
Control Flow Statements	38
Selection Statements	38
Iteration Statements	40
The Jump Statements	42
The With Statement	43
Sub procedures and Functions.....	43
Understanding Scope.....	45
Block Scope	46
Procedure Scope	47
Module Scope	47
Namespace Scope.....	48
Exception Handling.....	48
Structured Exception Handling.....	49
Unstructured Exception Handling.....	50
<i>Immediate Solutions</i>	52
Using the If Else Statement.....	52
Using the Select Case Statement	52
Using the While Statement	53
Using the Do While Statement.....	54
Using the For Statement.....	55
Using the For Each Statement	56
Using the With Statement.....	57
Jumping to the Labeled Statement	58
Breaking Out of a Loop.....	59
Using the Continue Statement	60
Creating Sub procedures	61
Passing Variable Number of Arguments to a Procedure	62
Specifying Optional Procedure Arguments	62

Creating Functions	63
Using the On Error Resume Next Statement	64
Using the On Error Statement.....	64
Capturing an Exception	65
Throwing an Exception.....	66
Summary.....	66
Chapter 3: Object-Oriented Programming in Visual Basic 2008	67
<i>In Depth</i>	68
Classes and Objects	68
Constructors and Destructors.....	68
Shared Members.....	69
Access Modifiers.....	69
Structures and Modules.....	70
Encapsulation.....	71
Inheritance	71
Inheritance Modifiers	72
Extension Methods.....	72
Polymorphism.....	73
Compile Time Polymorphism/Overloading.....	73
Runtime Polymorphism/Overriding	75
Shadowing	75
Abstraction	76
Abstract Classes and Abstract Methods.....	76
Interface	77
Syntax of Interfaces	78
Implementation of Interfaces.....	78
Interface and Inheritance.....	79
<i>Immediate Solutions</i>	80
Creating a Class	80
Creating a Constructor.....	80
Creating an Object	81
Creating Shared Members.....	82
Using the Is and IsNot Operators to Compare Two Objects.....	83
Creating Destructors	84
Using the Finalize Method.....	84
Using the Dispose Method.....	85
Creating Structures.....	86
Implementing Inheritance	87
Creating an Extension Method	87
Implementing Early Binding/Overloading	88
Implementing Late Binding/Overriding.....	89

Table of Contents

Implementing Shadowing	90
Using the MyBase Keyword.....	91
Using the MyClass Keyword	92
Creating Abstract Classes and Abstract Methods	93
Using the NotInheritable and NotOverridable Keywords.....	94
Creating and Implementing Interfaces	95
Summary.....	96
Chapter 4: Windows Forms in Visual Basic 2008	97
<i>In Depth</i>	98
All about Windows Forms	98
<i>Immediate Solutions</i>	103
Creating Windows Forms Applications	103
Adding Controls to Windows Forms.....	104
Disabling and Enabling Windows Forms.....	105
Changing the Title of Windows Forms.....	106
Setting the Border of Windows Forms.....	107
Displaying and Hiding the Maximize, Minimize, and Close Buttons of Windows Forms.....	108
Specifying the Initial Position of Windows Forms	108
Creating Multiform Windows Applications	109
Setting the Startup Form	112
Displaying Messages.....	113
Using the MsgBox Function.....	113
Using the MessageBox.Show Method	115
Using Windows Forms to Create Dialog Boxes.....	118
Creating a Dialog Box.....	118
Displaying and Reading Data from Dialog Boxes	119
Creating the Accept and Cancel Buttons.....	119
Creating Owned Windows Forms.....	120
Creating Always-On-Top Windows Forms	121
Performing Some Common Operations on Controls.....	122
Hiding and Displaying Controls.....	122
Disabling and Enabling Controls	124
Specifying the Tab Order of Controls.....	125
Specifying Access Characters for Controls	127
Moving and Resizing Controls.....	128
Adding a Control at Runtime.....	129
Handling Common Events for Windows Forms and Controls	130
Handling Mouse Events.....	131
Handling Keyboard Events.....	131
Specifying the Mouse Cursor for Windows Forms and Controls	134
Summary.....	138

Chapter 5: Windows Forms Controls.....	139
<i>In Depth</i>.....	140
The Control Class	140
The Button Control.....	146
The Label Control.....	147
The TextBox Control.....	148
The RichTextBox Control.....	150
The MaskedTextBox Control.....	153
The MenuStrip Control.....	155
The ToolStripMenuItem Class	157
The ContextMenuStrip Control	158
<i>Immediate Solutions</i>	160
Using the Button Control.....	160
Setting the Captions of Buttons	160
Setting the Background and Foreground Colors of Buttons	161
Adding an Image to a Button	162
Handling the Click Events of Buttons	164
Handling Button Releases	165
Using the Label Control.....	166
Formatting the Text in Labels.....	166
Handling the Click and DoubleClick Events of Labels.....	168
Using Labels to Specify Access Keys for Other Controls.....	168
Using the TextBox, RichTextBox, and MaskedTextBox Controls.....	169
Adding Text to TextBox, RichTextBox, and MaskedTextBox Controls.....	169
Restricting Characters in TextBox Controls.....	170
Controlling the User Input with MaskedTextBox Controls.....	171
Using the MenuStrip and ContextMenuStrip Controls.....	172
Adding Menu Items.....	173
Adding Submenus	174
Disabling and Enabling Menu Items	176
Hiding and Displaying Menu Items	177
Displaying Checkmarks on Menu Items.....	178
Displaying a Separator between the Menu Items	179
Setting Access Keys for Menu Items.....	180
Setting the Shortcut Keys for Menu Items	181
Adding Images to the Menu Items	182
Creating Context Menus	184
Associating a Context Menu with another Controls	185
Summary.....	186

Chapter 6: Introducing Windows Presentation Foundation	187
<i>In Depth</i>	188
Main Features of WPF 3.5.....	188
Improved Application Model.....	188
Improved Controls.....	189
Support for Data Validation and Data Binding Models and LINQ.....	189
Support for High-End Text Rendering, Typography, and Documents	189
Enhanced Support for 2-D and 3-D Graphics, Animation, and Multimedia.....	190
WPF 3.5 Architecture	190
PresentationFramework	191
PresentationCore	191
WindowsBase	191
MIL or Milcore.....	191
WPF 3.5 Class Hierarchy	192
The System.Windows.Threading.DispatcherObject Class.....	192
The System.Windows.DependencyObject Class.....	192
The System.Windows.Freezable Class	193
The System.Windows.Media.Visual Class.....	193
The System.Windows.UIElement Class	193
The System.Windows.FrameworkElement Class	194
The System.Windows.Controls.Control Class	194
The System.Windows.Controls.Panel Class	194
The System.Windows.Shapes.Shape Class	195
The System.Windows.ContentElement Class	195
WPF 3.5 Application Model	195
Types of WPF Applications	195
The Application Class.....	202
Exploring the WPF 3.5 Designer Interface.....	204
Design View	205
XAML View	209
Split View Bar.....	210
Tag Navigator.....	212
Solution Explorer	212
Properties Window	213
Toolbox.....	214
Document Outline Window	214
Using XAML in WPF 3.5 Applications	215
XAML Elements	215
Namespaces and XAML.....	216
XAML Property Syntax	217
Markup Extensions	218
WPF Properties	220

Dependency Properties	220
Attached Properties	228
WPF Events	230
Routed Events.....	230
Attached Events.....	235
Lifetime Events.....	236
Working with Dialog Boxes in WPF Applications	237
The MessageBox Class.....	238
The OpenFileDialog Class.....	238
The SaveFileDialog Class	238
The PrintDialog Class.....	239
Compiling and Running WPF 3.5 applications	239
Immediate Solutions	242
Working with WPF Windows.....	242
Adding Rows and Columns to a Grid Through XAML	245
Creating a Dialog Box in a WPF 3.5 Application.....	247
Using a Message Box	247
Using the Print Dialog Box	248
Working with Custom Routed Events.....	250
Summary.....	252
Chapter 7: Using Graphics and Multimedia in Windows Forms and WPF	253
In Depth	254
Graphics in Windows Forms Applications	254
GDI+ Managed Class Interface	254
Basic GDI+ Managed Classes	255
Graphics, Animation, and Multimedia in WPF 3.5.....	261
2-D Graphics	262
The DrawingContext Class	270
3-D Graphics	271
Animation in WPF 3.5.....	275
Multimedia in WPF 3.5.....	285
Immediate Solutions	292
Using Graphics in Windows Forms	292
Using 2-D Graphics in WPF 3.5	294
Using 2-D Shapes	294
Creating Stretchable Shapes.....	295
Drawing Geometry	296
Combining Multiple Geometries	297
Transforming Shapes	298
Using the Path Shape and PathGeometry Geometry	299

Table of Contents

Using Brushes	301
Changing the Tile Size and the Pattern of Brushes	304
Creating Reflections using VisualBrush	305
Preserving the Aspect Ratio of Image	307
Using 3-D Graphics in WPF 3.5	308
Creating 3-D Models	308
Using DrawingBrush to Apply Material on 3-D Models	309
Adding Cameras	311
Adding Lights	314
Transforming 3-D Models	318
Using Animation in WPF 3.5	322
Creating Animations Using Storyboards	323
Changing the Speed of Animations	326
Reversing the Animation	328
Controlling the Behavior of Animation	329
Specifying the Behavior of Animation after Ending	330
Running Multiple Animations Simultaneously	331
Controlling Storyboards Interactively	332
Using DoubleAnimation to Transform Controls	335
Creating Local Animations	337
Using Keyframe Animation	338
Animating Geometries	343
Using Animation with 3-D Models	343
Using Multimedia in WPF 3.5	347
Displaying Images using the Image Control	347
Transforming Images	348
Stretching Images	349
Using MediaElement to Control the Media Playback	351
Adding Media Using MediaPlayer	352
Using Storyboard to Control the Media Playback	353
Playing a Media on a User Event	355
Transforming a Video in MediaElement	358
Summary	360
Chapter 8: Introducing Windows Communication Foundation	361
<i>In Depth</i>	362
WCF Client-Server Architecture	362
Instancing Model of WCF Services	362
per-call Instancing Service	363
per-session Instancing Service	364
Sharable Instancing Service	365
Singleton Instancing Service	366

WCF Layers	366
Contracts	367
Service Runtime.....	367
Messaging	368
Hosting and Activation	368
WCF Endpoints.....	369
Endpoint Addresses.....	370
Bindings.....	370
Service Contracts.....	372
Behaviors.....	375
Configuration of WCF Services	375
WCF Clients	377
WCF Service Identity	378
WCF and ASP.NET AJAX	378
Immediate Solutions	380
Creating WCF Services	380
Creating a Service Contract and Defining the Operations.....	380
Implementing the Service Contract	380
Configuring the Service.....	381
Hosting WCF Services	385
Using the WCF Service	396
Creating a WCF Client.....	396
Configuring the WCF Client.....	401
Calling Operations of a WCF Service	401
Using WCF Services with ASP.NET AJAX.....	403
Creating an ASP.NET AJAX Enabled WCF Service	403
Calling WCF Services from Client-side Scripts	406
Summary.....	410
Chapter 9: Data Access with ADO.NET.....	411
In Depth	412
Introducing Databases	412
Introducing SQL	412
The SELECT Statement.....	413
The WHERE Clause	413
The LIKE Clause.....	413
The DISTINCT Clause	413
The Logical Operations	414
The ORDER BY Clause.....	414
The GROUP BY Clause.....	414
The DELETE Statement	414
The UPDATE Statement.....	414

Table of Contents

Joining Tables	414
The DROP Statement	415
Introducing ADO.NET.....	415
Describing the Architecture of ADO.NET	416
ADO.NET Entity Framework	419
Immediate Solutions	421
Creating Connection Strings	421
Syntax for connection strings.....	424
Creating a Connection to a Database	425
SQL Server Database	425
OLEDB Database.....	430
ODBC Data Source.....	437
Creating a Command Object.....	445
Working with DataAdapters.....	446
Creating DataSet from DataAdapter	446
Paging with Data Adapters.....	447
Updating with Data Adapters.....	449
Adding Multiple Tables to a DataSet	450
Creating DataView.....	451
Using DataReader to Work with Databases.....	453
Summary.....	454
Chapter 10: Data Binding in Windows Forms and WPF Applications	455
In Depth	456
Basic Data Binding Concepts	456
Types of Data Binding.....	456
Simple Data Binding	457
Complex Data Binding	457
Binding Data to Windows Forms Controls	457
Data Binding in Windows Presentation Foundation	458
Data Flow Directions in WPF	458
Sources of Data Binding.....	458
CLR Objects.....	459
ADO.NET	459
XML	459
DependencyObject	459
Declaration of Data Binding.....	459
XAML Based Binding	459
Code Based Binding.....	460
Binding Path Syntax.....	460
Binding to Collections	460
ADO.NET Data Services	460

Immediate Solutions	462
Creating a Simple Data Binding in Windows Forms.....	462
Creating a Complex Data Binding in Windows Forms	466
Binding Windows Forms Controls.....	467
Text Boxes and Labels.....	467
Check Boxes	468
Combo Boxes	470
List Boxes.....	471
Checked List Boxes	472
MenuStrip and StatusStrip Controls.....	473
Using the BindingContext Class.....	475
Navigation in DataSet.....	475
Using Parameterized SQL Queries.....	478
Simple Binding in WPF.....	479
Binding to CLR Object in WPF	481
Binding to ADO.NET objects in WPF	484
Binding to XML Objects in WPF.....	486
DependencyObject Bindings in WPF	487
Implementing Validation Rules with Data Binding.....	488
Data binding to Web Services in WPF	491
Creating ADO.NET Data Service Application.....	495
Summary.....	498
Chapter 11: Working with LINQ	499
In Depth	500
LINQ Queries	500
Data Sources in LINQ Queries	500
Deferred Execution and Immediate Execution	501
Standard Query Operators	501
The Filtering Operators	502
The Projection Operators.....	502
The Sorting Operators	503
The Join Operators	503
The Grouping Operators.....	503
The Quantifier Operators.....	504
The Partitioning Operators	504
The Set Operators.....	504
The Element Operators.....	505
The Aggregate Operators.....	505
The Conversion Operators.....	505
The Generation Operators.....	506
LINQ to Objects	506

Table of Contents

Strings	506
Reflections	506
File Directories.....	507
Introducing LINQ to ADO.NET	507
LINQ to DataSet	507
LINQ to SQL	508
Introducing LINQ to XML.....	508
Difference Between LINQ to XML and the DOM Method	509
Working with XML Trees in LINQ.....	509
The LinqDataSource Control.....	509
Extension Methods	512
Anonymous Types	512
Lambda Expressions	512
Immediate Solutions	513
Creating a LINQ to DataSet Application.....	513
Creating a LINQ to SQL Application.....	514
Creating a LINQ to Object Application	516
Creating a LINQ to XML Application.....	517
A Simple LinqDataSource Application.....	519
Using a LINQ Extension Method	523
Using the Where Clause	524
Type Filtering.....	525
Using the Projection Operators.....	525
Using the Sorting Operators.....	526
Using the Join Clause	527
Using the Grouping Operators	528
Grouping with Nested Objects	529
Using the Partitioning Operators	530
Using the Set Operators	530
Using the Aggregate Operators	531
Using the Conversion Operators	532
Using the Generation Operators.....	533
Summary.....	534
Chapter 12: Working with Windows Workflow Foundation	535
In Depth	536
Workflow Principles.....	536
Components of Windows Workflow Foundation.....	536
Host Process.....	537
Runtime Services.....	537
Runtime Engine.....	537
Workflow	537

Base Activity Library	538
Custom Activities	539
Types of Workflows	540
The Sequential Workflow	540
The State Machine Workflow	540
Conditions and Rules in Workflows	541
Simple Conditions	541
The CAG Activity	541
The PolicyActivity Activity	542
Immediate Solutions	543
Developing a Simple Workflow Application	543
Implementing Conditions in Workflows	544
Using Workflows with Windows Forms	547
Summary	550
Chapter 13: Collections and Generics	551
<i>In Depth</i>	552
Understanding Collections	552
Collection Classes in .NET	553
The ArrayList Class	553
The Hashtable Class	555
The SortedList Class	556
The Stack Class	557
The Queue Class	558
The BitArray Class	559
Limitations of Collection Classes	561
Generics	562
Generic Collection Classes in .NET	563
The Generic List(Of T) Class	563
The Generic LinkedList(of T) Class	565
The Generic SortedList(Of TKey, TValue) Class	566
The Generic Dictionary(Of TKey, TValue) Class	567
The Generic SortedDictionary(Of TKey, TValue) Class	567
The Generic Stack(Of T) Class	568
The Generic Queue(Of T) Class	569
The Generic HashSet(Of T) Class	569
<i>Immediate Solutions</i>	571
Working with Collection Classes	571
Using the ArrayList Class	571
Using the Hashtable class	574
Using the SortedList Class	578
Using the Stack Class	582

Table of Contents

Using the Queue Class.....	585
Using the BitArray Class.....	588
Working with Generic Collection Classes.....	590
Using the Generic List(of T) Class.....	591
Using the Generic LinkedList(of T) Class.....	595
Using the Generic SortedList(Of TKey, TValue) Class.....	601
Using the Generic Dictionary(Of TKey, TValue) Class.....	605
Using the Generic SortedDictionary(Of TKey, TValue) Class.....	608
Using the Generic Stack(Of T) Class.....	611
Using the Generic Queue(Of T) Class.....	614
Using the Generic HashSet(Of T) Class.....	617
Summary.....	620
Chapter 14: The My Object.....	621
<i>In Depth</i>.....	622
The My.Computer Object.....	622
The My.Computer.Audio Object.....	622
The My.Computer.Clipboard Object.....	623
The My.Computer.Clock Object.....	624
The My.Computer.FileSystem Object.....	624
The My.Computer.Info Object.....	625
The My.Computer.Keyboard Object.....	626
The My.Computer.Mouse Object.....	626
The My.Computer.Name Object.....	627
The My.Computer.Network Object.....	627
The My.Computer.Ports Object.....	627
The My.Computer.Registry Object.....	627
The My.Computer.Screen Object.....	628
The My.Application Object.....	629
The My.Application.Log Object.....	629
The My.Application.Info Object.....	629
The My.Forms Object.....	630
The My.User Object.....	630
The My.WebServices Object.....	631
<i>Immediate Solutions</i>.....	632
Using the My.Computer Object.....	632
Using the My.Application Object.....	636
Using the My.Forms Object.....	639
Using the My.User Object.....	643
Using the My.WebServices Object.....	645
Summary.....	648

Chapter 15: .NET Assemblies	649
<i>In Depth</i>	650
.NET Assemblies.....	650
Components of Assembly	650
Types of Assemblies	654
Attributes of an Assembly	655
Assembly Signing.....	657
Storage for Assemblies	660
Assembly Information File.....	661
Configuration Files for Assemblies.....	662
<i>Immediate Solutions</i>	665
Creating a Shared Assembly	665
Strong Naming the Assembly.....	665
Putting the Assembly in Global Assembly Cache	666
Creating a Simple Client.....	666
Creating a New Version of the Shared Assembly	667
Using New Version of Shared Assembly	668
Side-by-Side Execution of Shared Assemblies	670
Creating a Private Assembly.....	670
Creating a Multifile Assembly	672
Native Image Generation.....	674
Delayed Signing.....	675
Configuring Assembly Lookup	676
Configuring Probing.....	676
Configuring CodeBase for Signed Assemblies.....	678
CodeBase Settings for Unsigned Assemblies	680
Creating Publisher Policies.....	680
Summary.....	680
Chapter 16: Security in .NET	681
<i>In Depth</i>	682
Code Verification and Security in .NET Framework	682
Type-Safe and Verifiably Type-Safe MSIL Code.....	683
Authentication and Authorization	685
Role-Based Security	685
Principal Object	686
Identity Object	687
Role-Based Security Checks.....	688
Code Access Security (CAS).....	692
Security Policies.....	692
Evidence	693

Table of Contents

Code Groups	694
Permission Sets	696
Privileged Code and Security Demands in CAS.....	698
Immediate Solutions	701
Determining Whether Code is Verifiably Type Safe.....	701
Using Role-Based Security to Authenticate and Authorize Users	703
Performing Role-Based Security Checks	709
Modifying Existing Code Groups.....	713
Creating Code Groups	717
Creating Permission Sets	722
Calculating the Permission Grant of Code.....	725
Calculation of Permissions at a Policy Level by Code Group Traversal.....	725
Intersection of Permissions at all the Policy Levels	725
Specifying Permission Requirements in the Code	726
Understanding Stack Walk.....	728
Modifying Stack Walk.....	731
Avoiding Stack Walk with Link Demands.....	732
Partially Trusted Assemblies	733
Allowing Partial Trust Callers.....	734
Security Caveats.....	735
Understanding Sandboxing	735
Extracting Public Key out of a Strong Named Assembly	736
Summary.....	736
Glossary.....	737
Index.....	745
What's on the CD-ROM.....	749
