

Table of Contents

Chapter 1: Introduction to Production and Operation Management.....	1
1.1 Introduction	1
1.2 Total Production Function	2
1.3 General Problems that Disturb the Smooth Operation of Production Cycle.....	4
1.4 Types of Production Systems	5
1.5 Need of Production and Operations Management.....	11
1.6 Meaning and Definition of Production and Operations Management	11
1.7 Concept of Pre-planning	12
1.8 Scope and Objectives of Production Planning and Operation Control Functions.....	13
Production and Operation	13
1.9 Introduction to Product Design Development	14
1.10 Product life Cycle.....	14
1.11 Concept of Product Development.....	15
Issues related to Development Process	16
New Product Development Process.....	17
1.12 Concept of Product design	18
Objectives of Product designing	19
Factors influencing Product design	19
Product design and Standardization, Simplification, Specialization	22
1.13 Process Design.....	23
1.14 Factors Affecting Process Design.....	24
Selection of Appropriate Technology	24
Types of Processes	24
Process Flow Characteristics	25
Product Process Strategy.....	26
Process Flow Design.....	27
Review Questions	27
Chapter 2: Manufacturing Processes	29
2.1 Introduction to Manufacturing Processes	30
2.2 Turning Operations on Lathe Machine.....	30
2.3 Construction of Lathe Machine	31
2.4 Work Holding Devices	32
2.5 Tool Holders and Tool posts.....	34
2.6 Types of Turning Operation	35
2.7 Introduction to Milling	38
2.8 Types of Milling Machines	39
2.9 Milling Cutters	40
Milling Cutter Geometry.....	41
Types of Milling Cutters	41
2.10 Milling Operations	42
2.11 Introduction to Drilling Machines.....	47
2.12 Drilling Operations.....	47
Twist Drill Tools (Geometry)	48
Types of drill Bits (bits)	49
2.13 Tool (Drill) Holding Devices.....	51

2.14	Types of Drilling Machines	52
2.15	Introduction to Shaping Machine.....	53
	Types of Shaping machines	54
2.16	Operation on Shaping Machine	55
	Uses of Shaping Machines.....	55
2.17	Introduction to Hot and Cold Working Process	55
2.18	Hot Working	56
	Effects of hot working	56
2.19	Cold Working Process	57
2.20	Warm Forming	57
2.21	Advantages and Disadvantages of Hot and Cold forming	58
2.22	Introduction to Welding Processes.....	58
2.23	Types of Welding Processes	59
2.24	Concept of Weldability of Metals	59
2.25	Types of Weld Joints	59
2.26	Types of Welds.....	60
2.27	Welding Processes.....	61
	Arc welding.....	61
	Processes Using Non-consumable Electrodes	62
	Other Welding Process.....	63
	Atomic Hydrogen Welding	64
	Gas Welding Process	66
	Principle Working of Electric Resistance Welding (ERW)	69
2.28	Friction Welding	72
2.29	Ultrasonic Welding.....	73
2.30	Electron Beam Welding (EBW)	73
2.31	Laser Beam Welding	74
2.32	Welding Defects	74
2.33	Inspection of weld	75
2.34	Soldering and Brazing	76
	Fillers used for Brazing Process.....	78
2.35	Brazing Operations	78
	Advantages of Brazing	79
2.36	Soldering Operations	79
	Advantages and Limitations of Soldering.....	79
	Review Questions	80
Chapter 3: Processing of Polymeric Materials		81
3.1	Introduction to Polymers	81
3.2	Thermoplastics.....	83
3.3	Processing of Thermoplastics	83
	Molding	83
	Extrusion.....	85
3.4	Blow Moulding	85
3.5	Thermoforming	86
3.6	Thermosetting Plastics	86
	Molding of Thermosetting Plastics.....	86
3.7	Calendaring.....	88
3.8	Rotational Moulding	88
	Review Questions	88

Chapter 4: Operations Planning	89
4.1 Introduction	89
4.2 Key Business Objectives from Operations Planning	90
4.3 Other Issues related to Operations Planning	91
Task of a Process Engineer	92
Integration of Operation/Process engineering with other Functions of organization.....	92
4.4 Developing an Operations Plan (Operations Planning Sheet)	93
Part Drawing Analysis.....	94
Understand the General Technical Characteristics of Workpiece.....	94
Classifying the Operations.....	96
Selecting and Planning the Process of Manufacture.....	97
Establishing the Manufacturing Sequence	97
Selection of Equipment	98
Classification of Tooling	99
Estimation of Standard Production Time per Component	100
4.5 Initializing the Process Picture and Operation Routing	101
Process Picture Sheet	101
Advantages of a Process Sheet.....	103
4.6 Illustration Process Planning Sheet for Manufacturing.....	103
Ring Nut	104
4.7 Introduction to Development of Production Operation Orders.....	108
4.8 Different Forms of Production Orders	108
Production Order for Stock	109
Manually Prepared Set of Manufacturing Orders	110
Job Card	110
4.9 Set-Up Instructions.....	111
4.10 Charts Used For Formulation of Production Operation Order Sheet.....	112
Process Charts	113
Process Chart symbols	114
Activity Charts	120
4.11 New trends in Operation/Process Planning	120
Retrieval systems	121
Generative Process Planning.....	122
Review Questions	122
Chapter 5: Quality System	123
5.1 Introduction to the Concept of Quality	124
Defining Quality.....	124
5.2 Principles of Quality	125
5.3 Quality of Design	125
Factors affecting Quality of design	126
5.4 Quality of Conformance	126
5.5 Quality Characteristics	126
5.6 Costs of Quality.....	127
Optimum cost of predominance.....	127
Economics of Quality	128
5.7 Total Quality Management	129
Definitions of TQM.....	129

	Principles of T.Q.M	130
	Elements of T.Q.M. System	131
	TQM Models	132
	TQM implementation issues	135
	Benefits of TQM	136
5.8	Concept of Quality Control	137
	Quality Control Activities	137
	Objectives of Quality Control	138
5.9	Statistical Quality Control (SQC)	139
	Importance of Statistical Quality Control	139
5.10	Control Charts	140
	Control Chart Objectives	140
	Control charts for variable data	141
	Factors Responsible for Variation	141
	Causes of Variations	141
	Objectives of Variable Control Charts	141
	Quality improvement	141
	Control Charts for Attribute Data	144
5.11	Selection of SQC Charts	147
5.12	Quality Tools	147
	Pie chart	148
	Histogram/Bar Chart	149
	Scatter Diagram	151
	Cause effect diagram	151
	Pareto Chart	152
5.13	Quality Systems: ISO: 9000	153
	Need of Quality system	154
	ISO: 9000 series	154
	Advantages of ISO: 9000	156
	Limitations of ISO: 9000	156
	The Process of Implementation of ISO: 600	157
	Compare ISO 9000, QMS, and TQM	158
5.14	Guidelines for Performance Improvements	158
5.15	KAIZEN- A tool for Continuous Improvement System	158
5.16	Reliability	159
	Defining Reliability	160
	Quantification of Reliability	160
	Advantages of Reliability Program	161
5.17	Statistical Design of Experiment (DOE)	162
	Application of Statistical Design of Experiment	162
	Terminology	163
	When Do We Need Statistically Designed Tests?	163
	The Importance of DOE	165
	Advantages of Statistical Design Experiment [DOE]	165
	Requisites of a Good Test	166
	Review Questions	167
	Chapter 6: Computer Numerical Control Systems	169
6.1	Introduction to NC/CNC Machines	169
6.2	Numerical Control (NC)	170

Evolution of the CNC Machine Tools	170
Operational Sequence in Traditional NC Part Programming	171
Advantages of Numerical Control	172
6.3 Computer Numerical Control	172
Advantages of CNC	173
6.4 Elements of the NC System	173
6.5 Absolute and Incremental Coordinating used in Programming	174
6.6 NC Machine Motions.....	175
6.7 Types of the CNC Control Systems	176
Point to Point Control.....	176
Straight Line System	177
Continuous Path or Contouring System.....	177
6.8 Open and Close Loop Feedback Controls in the NC/CNC Machines.....	177
6.9 Operational Sequence in CNC Programming.....	178
6.10 Programming Formatting and Coding	180
Example of Programming.....	180
6.11 Advantages of the CNC Machines.....	182
6.12 Limitations of the CNC Machines	182
6.13 NC-CNC-DNC	182
6.14 Computer Numerical Control (CNC).....	183
6.15 Direct Numerical Control (DNC)	184
6.16 Part Programming	185
Review Questions	194
Chapter 7: Process Automation	195
7.1 Introduction to Simulation	196
Approaches to Simulation	196
Why Simulation?	197
7.2 Introduction to Simulation of Manufacturing System.....	198
Manufacturing Simulation Applications	199
Manufacturing Modeling Features.....	199
Material Handling	200
Simulation for Scheduling.....	201
Interpreting Results.....	202
7.3 Simulation Software for Manufacturing Applications	202
7.4 Developing Valid and Credible Simulation Models.....	203
7.5 Statistical Issues in Simulating Manufacturing System	204
Modeling System Randomness	204
Design and Analysis of Simulation Experiments	204
7.6 Introduction to Automation.....	205
Automation: Evolution and levels	205
Objectives of Automation	206
Types of Automation	206
7.7 Applications of Automation	207
7.8 Important issues Related to Automation	208
7.9 Advantages and Limitations of Automation	215
7.10 Introduction to Robot	216
Definition of Robot	217
Definitions Related to Industrial Robot Environment.....	217

x ► Table of Contents

Applications	218
7.11 Common Robot Designs.....	218
7.12 Robot Parts.....	221
7.13 Flexible Manufacturing Systems (FMS).....	224
FMS Equipment.....	225
Advantages of FMS.....	225
Applications of FMS.....	226
7.14 An Example of General View of a Flexible Manufacturing System.....	226
7.15 Introduction to Business Process Reengineering.....	227
Characteristics of process reengineering	227
Need of BPR/Why Reengineering	228
Methodology	229
Framework for Reengineering	230
Process of Reengineering	231
Advantages of Reengineering	231
Requirements of Business Process Reengineering.....	232
7.16 Introduction to Lean Manufacturing.....	232
7.17 Important Strategies used for Implementation of Lean Manufacturing.....	235
7.18 Introduction to Cellular Manufacturing.....	241
Benefits and Costs	244
7.19 Production Using Group Technology	244
Desirable Characteristics of Group for Implementing Group Technology	245
Formation of Part Families	246
7.20 Introducing Group Technology	248
Benefits of Group Technology.....	249
Review Questions	249
Chapter 8: Operator - Machine Systems	251
8.1 Introduction to Operator- Machine Systems	251
Categories of System	251
8.2 Introduction to Ergonomics	253
Ergonomic Design Considerations	255
8.3 Designing Tools Using Ergonomic Considerations.....	256
8.4 Redesigning the Workstations.....	261
Principles of Ergonomics.....	262
8.5 General Guidelines for Designing of Workstations	265
8.6 Job Analysis.....	268
Basic Procedure of Job Analysis using Method Study.....	268
System to Measure Injury Frequency	271
8.7 Impact of Artificial Intelligence on Operator-Machine System.....	271
Review Questions	274
Chapter 9: Facility Capacity and Layout Planning	275
9.1 Introduction to Capacity Planning	275
Significance of Capacity Planning	276
Concept of Aggregation	276
Input Data Required for Aggregate Capacity Planning	277
Definition of Capacity Planning	277
Measures of Capacity.....	277
Units of Capacity	278

	Example of Computing Capacity Utilization.....	279
	Best Operating Capacity Level and Size	279
9.2	Capacity Planning Process	280
9.3	Role of Capacity Planning in Manufacturing Planning and Control (MPC)	282
9.4	Analysis of Machine Capacity	283
	Machine Output/Loading Capacity.....	284
	Machine Interference	284
	Balancing Multi Machine by a Single Operator	285
9.5	Making Capacity Planning Decisions.....	286
	Decision Tree used in Facility Capacity Planning.....	286
	Break-Even Analysis	288
	Capital Budgeting	289
9.6	Life Cycle Analysis for Capacity Planning	289
9.7	Capacity Planning for Labor	290
9.8	Capacity Analysis Procedure for machines	291
9.9	Introduction to Facility Layout Planning	291
	Approaches to Facility Planning	292
	Scope of Facility Planning.....	293
	Factors Governing Facility Location Analysis.....	295
	Procedure for Facility Layout Planning	295
	Types of Plant Layout	296
9.10	When to Use Process, Product, and Fixed Position Layout.....	299
9.11	Types of Flow Pattern used in Plant Layout Design.....	300
9.12	Quantitative Techniques.....	301
9.13	Tools and Techniques Used for the Plant Layout Planning	301
	Relationship Chart (REL)	304
9.14	Quantitative Techniques Used for the Plant Layout Planning.....	306
	Review Questions	307
Chapter 10: Demand Management		309
10.1	Introduction.....	309
	Demand Management.....	310
	Demand Management in Manufacturing Planning and Control System.....	310
	Important aspects of Demand Management	312
10.2	Overview of MTO/BTO, MTS, MTA and MTE processes	312
	Made-to-Order (MTO) Environment.....	313
	Made-to-Stock (MTS) Environment	316
	The Assemble-to-Order (ATO) Environment.....	319
10.3	Communication between Demand Management with Sales and Operations planning	320
10.3	Communication between Demand Management with Master Production Scheduling (MPS).....	321
	Master Production Schedule.....	321
	Objectives of Master schedule in demand management.....	322
10.4	Dealing with Customers on a Day-To-Day Basis for Proper Demand Management	324
10.5	Information Use in Demand Management.....	324
	Concept of Made-to-Knowledge.....	325
	Data Capture and Data Monitoring Requirements	325

Customer Relationship Management (CRM)	326
10.6 Outbound Product Flow	327
Review Questions	328
Chapter 11: Material Requirement Planning (MRP) & Just-In-Time (JIT) practices	239
11.1 Introduction	330
11.2 MRP Objectives	330
11.3 MRP Terminology	331
11.4 MRP System Components	331
Inputs to MRP	332
MRP Logic	333
Information Processing Sequence	334
MRP Outputs	335
Updating MRP System in Dynamic Environment	336
Advantages of MRP	338
11.5 Manufacturing Resource Planning (MRP-II)	339
MRP-II Software- evaluation and selection	340
11.6 Difference Between MRP-I and MRP-II	340
11.7 Relationships between CRP, MRP, and MPS	341
Inputs and Outputs of the CRP Process	342
11.8 Just in Time (JIT) Practices	342
The Seven Wastes	343
Key Aspects Related to the JIT System	344
11.9 Important Issues Related to Integrated MRP-JIT Production System	345
11.10 Enterprise Resource Planning	348
11.11 ERP Modules (in-general)	349
11.12 ERP Implementation Issues	350
11.13 Strategies for ERP Implementations	352
Advantages of ERP Implementation	352
11.14 Forecasting for Strategic Business Planning	352
11.15 Objectives of Production Forecasting	354
Short Term Objectives	354
Long Term Objectives	354
Intermediate Range Objectives	355
Immediate Future Objectives	355
11.16 Requirements of Good Forecasting	356
11.17 Steps in Forecasting	357
11.18 Forecasting Methods	357
The Opinion and Judgment Method	358
Analytical Method (Time-Series method)	358
Quantitative Methods	360
Exponential Smoothing method	363
Regression Analysis	366
Review Questions	367
