Introduction.....	xxix
--------------------------	-------------

Part I: Introduction to ASP.NET 4.0

Chapter 1: ASP.NET 4.0 Essentials	1
Section I - Introduction to .NET	2
Evolution of .NET.....	2
Benefits of .NET Framework.....	2
Overview of .NET Framework 4.0	3
Common Language Runtime	4
Common Type System	5
Metadata and Assemblies	6
.NET Framework Class Library	8
Windows Forms.....	9
ASP.NET and ASP.NET AJAX.....	9
ADO.NET.....	10
Windows Workflow Foundation	11
Windows Presentation Foundation.....	11
Windows Communication Foundation	12
Windows CardSpace	14
LINQ.....	15
Exploring New Features of .NET Framework 4.0	16
Improved Application Compatibility and Deployment Support	16
Dynamic Language Runtime.....	16
Managed Extensibility Framework	17
Parallel Computing.....	17
Improved Security Model.....	18
Networking Improvements.....	18
Improved Core ASP.NET Services	18
Improvements in WPF	18
Improved Entity Framework.....	19
Integration of WCF and WF	19
Section II - Introduction to Visual Studio 2010 IDE.....	20
Exploring New Features of Visual Studio 2010 IDE	20
Enhanced Docking Behavior	20
Zoom	21
Box Selection.....	21
Call Hierarchy	22

Table of Contents

Navigate To	22
Highlighting References.....	23
Generate From Usage	23
IntelliSense Suggestion Mode	24
Exploring the Visual Studio 2010 IDE	25
Start Page	25
Menu Bar.....	26
Toolbar	26
Toolbox.....	27
The Code Editor	27
Solution Explorer	29
The Properties Window	30
The Object Browser.....	31
Class View	32
Server Explorer.....	33
The Manage Styles Window	34
The Output Window	35
Task List	35
The Error List Window	36
The Command Window.....	37
The Help Viewer Window	37
Section III - ASP.NET 4.0 Overview	38
Exploring New Features of ASP.NET 4.0.....	39
ASP.NET Core Services.....	39
ASP.NET Web Forms	40
Dynamic Data.....	41
ASP.NET Chart Control	41
Microsoft AJAX Functionality	41
Support for MVC based Web Applications	42
Improved CSS Compatibility	42
The ASP.NET Technologies	42
MVC Framework	42
ADO.NET Entity Framework.....	43
ADO.NET Data Services Framework.....	43
The Silverlight Technology.....	43
Dynamic Data Framework.....	43
The ASP.NET Life Cycle.....	43
Life Cycle of ASP.NET Applications on IIS 7.5.....	43
Life Cycle of an ASP.NET Web Page.....	45
Exploring a Sample ASP.NET 4.0 Web Application	46
Creating a Sample ASP.NET 4.0 Website.....	48
Section IV - Snapshot of .NET Related Technologies	54
Web Parts Framework	55
LINQ	55
ADO.NET Entity Framework	55
ASP.NET Dynamic Data Applications	55
ASP.NET AJAX.....	55
Silverlight Technology.....	56

ASP.NET Web Services	56
The WCF Services.....	56
ASP.NET MVC Framework.....	56
Summary	56
Chapter 2: Developing a Web Application	57
Specifying a Location for a Web Application	58
File System.....	58
HTTP	59
FTP.....	62
File Types in ASP.NET 4.0	64
Exploring ASP.NET 4.0 Web Pages	66
Code Render Blocks.....	69
ASP.NET 4.0 Coding Models.....	70
Single-File Page Model.....	70
Code-Behind Page Model	72
Understanding ASP.NET 4.0 Page Directives	73
The @ Page Directive	74
The @ Control Directive	74
The @ Import Directive	75
The @ Implements Directive.....	75
The @ Register Directive	75
The @ Assembly Directive	75
The @ Master Directive	75
The @ PreviousPageType Directive.....	75
The @ MasterType Directive.....	75
The @ OutputCache Directive.....	76
The @ Reference Directive	76
Working with Server Controls.....	76
Understanding the Provider Model in ASP.NET 4.0.....	79
Implementing Code Sharing.....	80
Using the Code Directory	80
Using the bin Directory	81
Using the Global Assembly Cache.....	81
Compilation in ASP.NET 4.0	82
Dynamic Compilation in ASP.NET 4.0.....	83
Compiling on First Request.....	83
Recompiling on Change.....	83
Compilation Dependencies	83
Compilation Output	83
Multiple Language Support	84
Optimizing Dynamic Compilation	84
Disadvantages of Dynamic Compilation.....	84
Summary	84
Chapter 3: Application Structure and State.....	85
In Depth.....	86
Structure of an Application.....	86

Table of Contents

The Application Domain.....	86
The Application Lifetime	87
The Application Directory Structure	87
The Global.asax Application File	88
Using States.....	89
Application State.....	90
Session State.....	90
View State	90
HTTP Handlers.....	90
Postback and Cross-Page Posting	91
Immediate Solutions.....	86
Using the Global.asax File.....	92
Using Application State, Session State, and View state.....	94
Creating an HTTP Handlers Application.....	98
Creating Generic Handlers Application.....	99
Working with Postback and Cross-Page Posting.....	103
Summary	108
<u>Part II: ASP.NET 4.0 Controls</u>	
Chapter 4: Web Forms: Standard Controls (I).....	109
In Depth.....	110
The Control Class	110
The WebControl Class.....	112
The Label Control.....	113
The Button Control	114
The TextBox Control.....	115
The Literal Control.....	116
The Placeholder Control.....	116
The HiddenField Control	116
The FileUpload Control.....	117
Immediate Solutions.....	118
Using CSS in Web Applications	118
Working with Control Properties.....	124
Working with Label Controls	132
Working with Button Controls.....	134
Working with TextBox Controls.....	136
Working with Literal Controls	138
Working with Placeholder Controls	141
Working with HiddenField Controls.....	143
Working with the FileUpload Control.....	145
Summary	148
Chapter 5: Web Forms: Standard Controls (II).....	149
In Depth.....	150
The Image Control	150
The ImageButton Control.....	151

The ImageMap Control	152
The ListBox Control	152
The DropDownList Control	153
The BulletedList Control	153
The HyperLink Control	155
The LinkButton Control	155
The CheckBox Control.....	156
The CheckBoxList Control	157
The RadioButton Control	157
The RadioButtonList Control.....	158
The Table Control.....	158
The Panel Control.....	159
The Wizard Control	159
The Xml Control	162
The View Control	163
The MultiView Control	163
The Substitution Control	164
The Localize Control.....	164
The Calendar Control	165
The AdRotator Control.....	166
Immediate Solutions.....	168
Working with Image Controls	168
Working with ImageButton Controls	171
Working with ImageMap Controls	173
Working with ListBox Controls.....	177
Working with DropDownList Controls	183
Working with BulletedList Controls.....	186
Working with HyperLink Controls	189
Working with LinkButton Controls.....	191
Working with CheckBox Controls	194
Working with CheckBoxList Controls.....	199
Working with RadioButton Controls.....	201
Working with RadioButtonList Controls	206
Working with Table Controls	208
Working with Panel Controls	213
Working with Wizard Controls.....	216
Working with MultiView and View Controls	223
Working with Calendar Controls.....	227
Creating the AdRotator Control.....	229
Summary	232
Chapter 6: Navigation Controls: TreeView, Menu, and SiteMapPath.....	233
In Depth.....	234
Using the TreeView Class	234
The TreeView Control	236
Adding Nodes to a TreeView Control Dynamically	237
Adding Nodes to a TreeView Control Using the DataSource Property	238

Table of Contents

Adding Nodes to a TreeView Control at Design Time	238
Using the Menu Class	239
The Menu Control	242
Menu Display Properties	243
Menu Styles	243
Using the SiteMapPath Class.....	243
The SiteMapPath Control.....	244
Data Retrieval Using the SiteMapPath Control	245
SiteMapPath Behaviors	245
SiteMapPath Style	246
SiteMapPath Templates	246
Immediate Solutions.....	247
Creating the TreeView Control	247
Generating TreeView from a Database	259
Creating Static Menus.....	265
Creating Dynamic Menus	269
Creating SiteMapPath.....	272
Summary	276
Chapter 7: Validation Controls.....	277
In Depth.....	278
The BaseValidator Class	278
The RequiredFieldValidator Control	279
The RangeValidator Control.....	279
The RegularExpressionValidator Control.....	280
The CompareValidator Control.....	281
The CustomValidator Control	281
The ValidationSummary Control.....	282
Immediate Solutions.....	284
Using the RequiredFieldValidator Control.....	284
Using the RangeValidator Control.....	286
Using the RegularExpressionValidator Control.....	289
Using the CompareValidator Control	291
Using the CustomValidator Control.....	294
Using the ValidationSummary Control.....	296
Summary	298
Chapter 8: Introducing Web Parts Controls	299
In Depth.....	300
The WebPartManager Control.....	300
The ProxyWebPartManager Control	310
The WebPartZone Control	312
The CatalogZone Control.....	314
The DeclarativeCatalogPart Control.....	316
The PageCatalogPart Control	319
The ImportCatalogPart Control	320

The EditorZone Control	322
The LayoutEditorPart Control.....	325
The AppearanceEditorPart Control	326
The PropertyGridEditorPart Control.....	328
The BehaviorEditorPart Control.....	329
The ConnectionsZone Control.....	331
Immediate Solutions.....	334
Using the WebPartManager Class	334
Creating the WebPartManager Control in Code.....	334
Creating the WebPartZone Control in Code.....	337
Creating the CatalogZone Control in Code	339
Creating the PageCatalogPart Control in Code.....	343
Creating the EditorZone Control in Code.....	346
Creating the PropertyGridEditorPart Control in Code	349
Creating the ConnectionsZone Control in Code	353
Summary	356
Chapter 9: Introducing HTML Controls	357
In Depth.....	358
Working with CSS.....	358
CSS Style Manager.....	358
Client and Server HTML Controls	360
HTML Server Control Classes	361
The HtmlControl Class.....	363
The HtmlContainerControl Class	363
The HtmlInputControl Class.....	364
The HtmlForm Class.....	364
The HtmlInputText Class.....	365
The HtmlTextArea Class.....	365
The HtmlAnchor Class.....	366
The HtmlButton Class.....	367
The HtmlInputButton Class	367
The HtmlInputImage Class	368
The HtmlSelect Class.....	369
The HtmlImage Class.....	370
The HtmlInputHidden Class.....	370
The HtmlInputCheckBox Class.....	370
The HtmlInputRadioButton Class	371
The HtmlTable Class	371
The HtmlTableRow Class	372
The HtmlTableCell Class	373
The HtmlInputFile Class.....	374
The HtmlGenericControl Class.....	374
Immediate Solutions.....	376
Using the CSS Style Manager	376
Working with HTML Server Controls.....	380
Using the HtmlForm Class.....	386

Table of Contents

Using the HtmlAnchor Class.....	389
Using the HtmlInputImage Class.....	392
Using the HtmlSelect Class.....	395
Using the HtmlInputFile Class.....	399
Summary.....	402

Part III: Accessing Data in ASP.NET 4.0

Chapter 10: Working with Database Controls	403
---	------------

In Depth.....	404
----------------------	------------

The GridView Control.....	404
The DataList Control.....	409
The DetailsView Control.....	410
The FormView Control.....	414
The ListView Control.....	418
The Repeater Control.....	421
The DataPager Control.....	423
The Chart Control	425
The QueryExtender Control	426
The SqlDataSource Control.....	428
The AccessDataSource Control	431
The LinqDataSource Control	433
The ObjectDataSource Control.....	437
The XmlDataSource Control.....	440
The EntityDataSource Control.....	443
The SiteMapDataSource Control.....	446

Immediate Solutions.....	448
---------------------------------	------------

Using the SqlDataSource Control.....	448
Using the AccessDataSource Control	455
Using the LinqDataSource Control.....	460
Using the ObjectDataSource Control.....	465
Using the XmlDataSource Control.....	469
The EntityDataSource Control.....	473
Using the GridView Control.....	479
Using the DataList Control	484
Using the DetailsView Control.....	488
Using the FormView Control.....	492
Using the Repeater Control.....	496
Using the ListView and DataPager Controls.....	500
Using the Chart Control	508
Using the QueryExtender Control	510
Summary.....	512

Chapter 11: LINQ Queries.....	513
--------------------------------------	------------

In Depth.....	514
----------------------	------------

Introducing LINQ Queries.....	514
Data Sources in LINQ Queries	515

Deferred Query Execution and Immediate Execution	515
LINQ and Generic Types	515
Standard Query Operators.....	516
Filtering Operators.....	516
Projection Operators.....	517
Sorting Operators.....	517
Join Operators	518
Grouping Operator	518
Quantifier Operators	519
Partitioning Operators.....	519
Set Operators	520
Element Operators.....	521
Aggregate Operators	521
Conversion Operators	523
Generation Operators	523
Zip Operator	524
Introducing LINQ to Objects	524
Strings.....	524
Reflections.....	525
File Directories	525
Introducing LINQ to ADO.NET.....	525
LINQ to DataSet.....	526
LINQ to SQL.....	526
Introducing LINQ to XML	527
Difference Between LINQ to XML and DOM Method	527
Working with XML Trees in LINQ.....	527
The LinqDataSource Control	528
Extension Methods.....	528
Anonymous Methods	529
Lambda Expressions.....	529
Comparing Lambda Expressions with Anonymous Methods	529
Introducing PLINQ.....	529
Immediate Solutions.....	531
Creating a LINQ to SQL Application	531
Creating a LINQ to Object Application.....	534
Creating a LINQ to XML Application	539
Creating a Sample Extension Method	544
Using the Where Clause.....	547
Type Filtering.....	550
Using the SelectMany() Clause.....	553
Using Sorting Operators.....	556
Using the Join Clause.....	560
Using the Grouping Operator	563
Using the Partitioning Operators	566
Using the Set Operators.....	570
Using the Aggregate Operators.....	573
Using the Conversion Operators.....	576

Table of Contents

Using the Generation Operators	580
Using the Zip Operator	583
Creating a Simple PLINQ Query.....	586
Summary	590
Chapter 12: ADO.NET Entity Framework	591
In Depth.....	592
Exploring ADO.NET Entity Framework.....	593
Exploring the Features of Entity Framework	595
Understanding the Entity Data Model	597
Data Modeling.....	597
Conceptual Schema Definition Language.....	598
Storage Schema Definition Language	600
Mapping Specification Language	600
The EDM Types.....	601
Type Constraints	602
Data Model Tools.....	602
Understanding Object Services.....	602
Classes of Object Services	603
Features of Object Services	604
Understanding Entity SQL Language	604
Features of Entity SQL	605
Operators for Entity SQL.....	607
Understanding the EntityClient Provider.....	607
ADO.NET Metadata	613
EDM Generator Tool.....	614
Immediate Solutions.....	618
Creating an Entity Data Model.....	618
Working with Entity Data Model Designer	622
Using the Entity Model Browser Window.....	622
Using the Mapping Details Window.....	624
Working with Entity Framework Controls.....	627
Creating an Entity by Using the Entity Control.....	627
Creating an Association by Using the Association Control.....	629
Creating an Inheritance by Using the Inheritance Control.....	630
Creating an EDM-Based Application	631
Summary	636
Chapter 13: Working With Files and Streams.....	637
In Depth.....	638
Introducing the System.IO Namespace.....	638
Working with Drives and Directories.....	640
Exploring the Directory Class.....	640
The DirectoryInfo Class.....	641
The DriveInfo Class	642
Working With Files	643
Working with File Properties and ACL.....	645

Understanding the System.IO.Stream Class.....	648
Understanding File Compression.....	650
Working with Serial Ports.....	651
Immediate Solutions.....	653
Retrieving Drive Information.....	653
Creating a Directory.....	656
Copying a Directory.....	659
Creating a Subdirectory.....	663
Viewing Subdirectories of a Directory.....	666
Retrieving Files from a Directory.....	669
Creating a File.....	672
Opening a File.....	675
Reading and Appending Text to a File.....	679
Retrieving Details of a File.....	683
Renaming or Moving a File.....	686
Compressing a File.....	690
Writing to Serial Ports.....	693
Summary.....	696
Chapter 14: Building ASP.NET Dynamic Data Applications.....	697
In Depth.....	698
Overview of ASP.NET Dynamic Data.....	698
Exploring Features of Dynamic Data.....	700
Enable Dynamic Data in Existing Projects.....	701
Declarative DynamicDataManager Control Syntax.....	701
Entity Templates.....	701
New Field Templates for URLs and E-mail Addresses.....	701
Create Links with the DynamicHyperLink Control.....	702
Support for Inheritance in the Data Model.....	702
Support for Many-to-Many Relationships.....	702
New Attributes to Control Display and Support Enumerations.....	702
Enhanced Support for Filters.....	702
Exploring Dynamic Data Controls.....	702
The DynamicControl Control.....	703
The DynamicDataManager Control.....	704
The DynamicEntity Control.....	705
The DynamicFilter Control.....	706
The DynamicHyperLink Control.....	707
The DynamicValidator Control.....	708
Immediate Solutions.....	709
Creating a Web Site Using ASP.NET Dynamic Data.....	709
Creating a Dynamic Data Entity Application.....	712
Customizing Dynamic Pages.....	717
Adding Dynamic Behavior to Data Controls.....	717
Using the DynamicValidator Control.....	718
Summary.....	720

Part IV: Building ASP.NET 4.0 Enterprise Applications

Chapter 15: Developing ASP.NET AJAX Applications 721

In Depth 722

- Exploring AJAX..... 722
- Introducing JavaScript..... 722
- Introducing XHTML..... 723
- Introducing CSS..... 723
- Exploring DOM..... 723
- Introducing the XMLHttpRequest Object 724
- Need for AJAX..... 725
- AJAX and Other Technologies 725
- Exploring New Features of AJAX 726
- Support for Live Data Binding 726
 - Support for Client-Side Template Rendering..... 727
 - Support for Declarative Instantiation of Client Components..... 727
 - Support for the Observer Pattern on JavaScript Objects and Arrays 727
 - Support for Invoking ADO.NET Data Services and Data Contexts 728
- ASP.NET 4.0 728
 - Support for the DataView Control 728
- New Features in the Microsoft AJAX Library 728
 - Imperative Syntax 729
 - Clientscript Loader 729
 - Client Data Access 729
 - Client DataContext and AdoNetDataContext Classes 729
 - jQuery Integration 729
- ASP.NET AJAX Architecture..... 730
 - Client-Side Architecture 730
 - Server-Side Architecture 731
 - Script Support..... 732
 - Web Services 732
 - Application Services 732
 - Server controls 732
 - AJAX Server or Extension Controls 733
 - The ScriptManager Control..... 733
 - The ScriptManagerProxy Control..... 736
 - The Timer Control 736
 - The UpdatePanel Control..... 737
 - The UpdateProgress Control 738

Immediate Solutions 739

- Differentiating Between AJAX and Non-AJAX Applications 739
 - Creating a Simple Non-AJAX Application 739
 - Creating a Simple AJAX Application..... 741
- Using AJAX Server Controls..... 743
 - Timer Control..... 744
 - The UpdateProgress Control..... 749
- Using the UpdateProgress Control for Single UpdatePanel Control 750

Customizing AJAX Controls.....	756
Summary	762
Chapter 16: ASP.NET AJAX Control Toolkit.....	763
In Depth.....	765
ASP.NET ACT Controls	765
Adjusting the Web Content	766
The AlwaysVisibleControlExtender Control.....	767
The CalendarExtender Control	767
The NumericUpDownExtender Control.....	768
The ResizableControlExtender Control	768
The SliderExtender Control	769
The DragPanelExtender Control.....	770
The CollapsiblePanelExtender Control.....	770
The Accordion Control.....	771
The TabContainer Control.....	771
The HoverMenuExtender Control.....	772
The AsyncFileUpload Control.....	773
Adding UI Effects.....	774
The MultiHandleSliderExtender Control	774
The AnimationExtender Control	775
The UpdatePanelAnimationExtender Control.....	775
The DropShadowExtender Control.....	776
The RoundedCornersExtender Control	776
The Rating Control	776
The TextBoxWatermarkExtender Control	777
The SlideShowExtender Control.....	777
The Seadragon Control	778
The HTMLEditor Control	779
The ColorPickerExtender Control.....	779
Validating Controls.....	780
The FilteredTextBoxExtender Control	780
The MaskedEditExtender and MaskedEditValidator Controls	781
The ValidatorCalloutExtender Control.....	783
The NoBot Control.....	783
The PasswordStrengthExtender Control	784
Working with Menus,Lists, and Pop-ups	785
The DropDownExtender Control	785
The CascadingDropDownExtender Control	786
The MutuallyExclusiveCheckBoxExtender Control.....	786
The ToggleButtonExtender Control	787
The ReorderList Control	787
The PagingBulletedListExtender Control	788
The ListSearchExtender Control	789
The ConfirmButtonExtender Control.....	789
The ModalPopupExtender Control	789
The PopupControlExtender Control	790
The DynamicPopulateExtender Control.....	791

Table of Contents

The AutoCompleteExtender Control	791
The ComboBoxExtender Control.....	792
Immediate Solutions.....	793
Installing the ASP.NET ACT	793
Using the AlwaysVisibleControlExtender Control.....	797
Using the CalendarExtender Control	801
Using the NumericUpDownExtender Control.....	802
Using the ResizableControlExtender Control	805
Using the SliderExtender Control	807
Using the DragPanelExtender Control.....	809
Using the CollapsiblePanelExtender Control	812
Using the Accordion Control.....	815
Using the TabContainer Control	819
Using the HoverMenuExtender Control	822
Using the AsyncFileUpload Control.....	824
Using the MultiHandleSliderExtender Control	827
Using the AnimationExtender Control.....	833
Using the UpdatePanelAnimationExtender Control.....	835
Using the DropShadowExtender Control	837
Using the RoundedCornersExtender Control	839
Using the Rating Control.....	842
Using the TextBoxWatermarkExtender Control	845
Using the SlideShowExtender Control	847
Using the Seadragon Control.....	850
Using the HTMLEditor Control	852
Using the ColorPickerExtender Control.....	854
Using the FilteredTextBoxExtender Control.....	856
Using the MaskedEditExtender and MaskedEditValidator Controls	858
Using the ValidatorCalloutExtender Control	861
Using the NoBot Control.....	863
Using the PasswordStrengthExtender Control	866
Using the DropDownExtender Control	869
Using the CascadingDropDownExtender Control	871
Using the MutuallyExclusiveCheckBoxExtender Control	874
Using the ToggleButtonExtender Control.....	877
Using the ReorderList Control.....	880
Using the PagingBulletedListExtender Control	885
Using the ListSearchExtender Control	887
Using the ConfirmButtonExtender Control.....	889
Using the ModalPopupExtender Control	891
Using the PopupControlExtender Control	894
Using the DynamicPopulateExtender Control.....	897
Using the AutoCompleteExtender Control	900
Using the ComboBoxExtender Control.....	903
Summary	904

Chapter 17: Inside Master Pages and Themes	905
In Depth	906
Need for Master Pages and Themes	906
Understanding Mater Pages	907
Simple Master Page	907
Nested Master Page	908
Understanding ASP.NET AJAX Master Pages	909
Understanding Themes	909
Exploring Types of Themes in ASP.NET 4.0	911
Understanding the StyleSheetTheme Attribute	911
Immediate Solutions	913
Creating Master Pages	913
Creating Simple Master Pages	913
Creating Nested Master Pages	918
Configuring Master Pages	920
Modifying Content on the Master Page from the Content Page	921
Overriding Properties and Methods of a Master Page	926
Loading Pages Dynamically	929
Creating Themes	935
Applying Themes at Control and Runtime Levels	938
Applying Themes to a Single Page	943
Using the StyleSheetTheme Attribute	945
Summary	948
Chapter 18: Inside Web Parts Framework	949
In Depth	950
Requirements for Web Parts Framework	950
Immediate Solutions	953
Personalizing Web Parts	953
Exchanging Data between Web Parts	969
Exporting Web Parts	978
Importing Web Parts	985
Modifying the Properties at Runtime	986
Authorizing Web Parts	993
Summary	996
Chapter 19: Developing Rich-Interactive Applications with Silverlight 3	997
In Depth	998
Main Features of Silverlight	998
Improved Programming Model	999
Comprehensive UI Framework	999
Support for Deep Zoom Technology	999
Support for 2-D Graphics, Animations, and Multimedia	999
Support for Networking	1000
Support for Higher Quality Video and Audio	1000
Empowering Richer Experience	1000

Table of Contents

Improving Rich Internet Application Productivity	1001
Enhanced Data Support	1001
Improved Performance	1001
Out of Browser Capabilities	1001
Architecture of Silverlight	1002
The .NET Framework for Silverlight	1002
The Core Presentation Framework	1003
Silverlight Applications in Visual Studio 2010	1003
Assemblies and Files in Silverlight Applications	1005
Controls in Silverlight Applications	1015
Silverlight and ASP.NET	1030
Data Binding in Silverlight	1033
Types of Data Binding in Silverlight	1033
Binding Object	1033
Data Context	1033
Converters	1034
DataTemplate and ObservableCollection	1034
Data Binding Using Networking API	1034
Immediate Solutions	1035
Creating a Simple Silverlight Application	1035
Using Silverlight Controls	1038
Using the Calendar Control	1038
Using the DatePicker Control	1049
Using the GridSplitter Control	1054
Using the HyperlinkButton Control	1057
Using the MediaElement Control	1059
Using the Popup Control	1063
Using the TabControl Control	1069
Using the AutoCompleteBox Control	1075
Using the DataPager Control	1080
Using the TreeView Control	1082
Integrating Silverlight with ASP.NET Applications	1084
Data Binding with Silverlight Application	1087
Summary	1096
Chapter 20: Caching in ASP.NET 4.0	1097
In Depth	1098
Caching in ASP.NET	1098
Output Caching	1099
The Location Attribute	1100
The Shared Attribute	1100
The VaryByCustom Attribute	1100
The VaryByParam Attribute	1101
Partial-Page Caching	1101
Post-Cache Substitution and Substitution Control	1102
Data Caching	1103
Adding Items in Cache	1104

Retrieving Data from Cache	1105
Deleting Items from Cache	1106
SQL Cache Notification and SQL Cache Invalidation	1106
Cache Dependencies	1107
Cache Profiles and Configuration	1107
The System.Web.Caching.Cache Class	1107
Immediate Solutions	1109
Using Output Caching	1109
Using Output Caching with the VaryByParam Attribute	1111
Using Data Caching	1114
Using Cache Profiles	1119
Using the Substitution Control	1123
Summary	1124
Chapter 21: Application Globalization	1125
In Depth	1126
Introducing Globalization	1126
Internationalization	1128
Localization	1129
Introducing Resources	1129
Immediate Solutions	1131
Listing the Available Cultures	1131
Working with Resources	1133
Local Resources	1133
Global Resources	1134
Using Localization Expression	1134
Implicit Expression	1134
Explicit Expression	1148
Implementing Localization	1160
HTML Controls	1160
Static Content	1160
Localizing Script Files	1167
Summary	1170
Chapter 22: ASP.NET Web Services	1171
In Depth	1172
Introducing Web Services	1172
Infrastructure of ASP.NET Web Services	1173
Web Services Directory	1173
Web Services Discovery	1174
Web Services Description	1174
Web Services Wire Format	1176
The Code Model of ASP.NET Web Services	1178
The WebService Directive	1179
The Code-Behind File	1179
Web Service Properties	1181

Table of Contents

Application Property	1181
Context Property	1182
Server Property	1183
Session Property	1184
ASP.NET AJAX and Web Services	1185
ASP.NET AJAX Client Architecture for Web Services	1185
ASP.NET AJAX Server Architecture for Web Services	1186
Securing Web Services	1187
Encryption and Message-Based Security	1187
Authentication and Access Controls for the Web Service	1187
Immediate Solutions	1188
Creating a Web Service	1188
Creating a Web Service Project	1188
Declaring the Web Service	1189
Setting the WebService Attribute	1190
Declaring Methods for a Web Service	1191
Deploying a Web Service	1193
Using the WebService Class	1197
Using the Web Service	1200
Using the EnableDecompression Property	1205
Sharing Data Across Web Services	1206
Calling a Web Service from the Client	1213
Caching with Web Services	1217
Working with ASP.NET AJAX Enabled Web Services	1220
Creating the ASP.NET AJAX-Enabled Web Service	1220
Calling the ASP.NET AJAX Enabled Web Service from Script	1223
Using the UpdatePanel Control with a Web Service	1225
Summary	1230
Chapter 23: WCF Services	1231
In Depth	1232
Architecture of WCF	1232
The Contracts Layer	1233
The Service Runtime Layer	1233
The Messaging Layer	1234
The Activation and Hosting Layer	1234
Features of WCF	1234
Endpoint Support	1235
Endpoint Behavior	1252
Enhanced Transport Layer	1253
Queuing Support	1253
Improved Transactional Process	1253
Improved Security	1253
Support for Hosting a WCF Service on Various Servers	1253
AJAX Integration and JSON Support	1254
Enhanced Features of WCF	1254
WCF Clients	1254

WCF Tools.....	1255
WCF Data Services.....	1256
Architecture of WCF Data Services Framework.....	1257
Features of WCF Data Services Framework.....	1257
The Data Services Addressing Scheme.....	1258
Data Services Resource Path.....	1259
Data Services Query Options.....	1261
Immediate Solutions.....	1263
Creating WCF Services.....	1263
Configuring a WCF Service.....	1265
Deploying WCF Services.....	1270
Building WCF Clients.....	1273
Using WCF Services with ASP.NET AJAX.....	1277
Exposing the WCF Services to an ASP.NET AJAX Web Application.....	1277
Calling WCF Services from Client-Side Script.....	1280
Creating WCF Data Services.....	1281
Summary.....	1288
Chapter 24: ASP.NET MVC Framework.....	1289
In Depth.....	1290
Model-View-Controller Architecture.....	1290
ASP.NET MVC Framework.....	1291
Understanding Model in MVC Framework.....	1291
Understanding View in MVC Framework.....	1291
Understanding Controller in MVC Framework.....	1292
ASP.NET MVC 2 Framework.....	1293
Introducing New Features in MVC 2.....	1293
Exploring API Improvements.....	1296
Understanding the Controller Class.....	1296
Understanding the URL Routing.....	1297
Immediate Solutions.....	1299
Creating an ASP.NET MVC Application.....	1299
Summary.....	1306
Chapter 25: Developing Websites Compliant with Web Standards.....	1307
In Depth.....	1308
Introducing to Web Standards.....	1308
Understanding XHTML.....	1308
Understanding Accessibility Standards.....	1310
Immediate Solutions.....	1311
Using the xhtmlConformance Tag to Specify the Level of XHTML Conformance.....	1311
Using the alt Attribute for Accessibility.....	1311
Using the <label> Tag for Accessibility.....	1313
Using the <fieldset> Tag for Accessibility.....	1317
Using the accesskey and tabindex Attributes.....	1321
Setting Headers for Accessibility.....	1324

Validating Pages for Web Standards Compliance 1326
Summary 1328

Part V: Administering ASP.NET 4.0

Chapter 26: Application Tracking 1329

In Depth 1330

Application Monitoring..... 1330
Performance Counters..... 1330
Health Monitoring with Web Events 1334
Debugging an Application 1334
Application Tracing Using ASP.NET Trace 1334
Exception and Error Handling 1336
The Application_Error Method 1336
Monitor a Website Using Events..... 1336

Immediate Solutions 1337

Using the Debug Mode..... 1337
Using Breakpoints 1340
Using the <customErrors> Element..... 1342
Using the Page_Error Method 1346
Using the Page Directive with the Trace Attribute 1349
Using the Trace Class Methods 1351
Summary 1352

Chapter 27: Managing Web Applications 1353

In Depth 1354

Need to Manage Applications 1354
The ASP.NET Configuration File 1354
The processModel Configuration..... 1355
Reactive Process Recycling 1355
Proactive Process Recycling..... 1355
The ASP.NET MMC Snap-In Tool 1356
The aspnet_regiis Tool..... 1356
The Web Site Administration Tool..... 1357
The Aspnet_regsql Tool..... 1358

Immediate Solutions 1359

Verifying the Configuration Settings 1359
Using the ASPNET_REGIIS Tool 1362
Using the ProtectSection Method 1363
Using the Web Site Administration Tool 1366
Using the Security Tab 1367
Using the Application Tab 1371
Using the Provider Tab 1374
Using the Aspnet_regsql Tool 1374
Configuring ASP.NET Applications in IIS..... 1375
Summary 1378

Part VI: Security in ASP.NET 4.0

Chapter 28: Working with Login Controls	1379
In Depth.....	1380
The Membership Service.....	1380
The Login Control.....	1381
The LoginView Control.....	1383
The LoginStatus Control.....	1385
The LoginName Control.....	1386
The PasswordRecovery Control.....	1387
The CreateUserWizard Control.....	1390
The ChangePassword Control.....	1395
Immediate Solutions.....	1399
Implementing Authentication in ASP.NET Using Login Controls.....	1399
Summary.....	1408
Chapter 29: Working with User Profiles.....	1409
In Depth.....	1410
Introducing User Profiles.....	1410
Understanding the ProfileProvider Class.....	1411
Anonymous Profiles.....	1412
Authenticated Profiles.....	1414
Immediate Solutions.....	1416
Creating User Profile.....	1416
Using Complex Data Types.....	1419
Creating Authenticated Profiles.....	1423
Creating Custom Profile Providers.....	1442
Migrating Profiles.....	1448
Summary.....	1452
Chapter 30: Security and Cryptography in ASP.NET.....	1453
In Depth.....	1454
Introducing Code Verification and Security in .NET Framework.....	1454
Type-Safe Code.....	1455
Verifiably Type-Safe MSIL Code.....	1456
Security Changes in the .NET Framework 4.....	1457
Security Policy Simplification.....	1457
Security Transparency Level 2.....	1457
Obsolete Permission Requests.....	1457
Conditional APTCA.....	1457
Evidence Objects.....	1457
Evidence Collections.....	1458
Introducing Authentication and Authorization.....	1458
Role-Based Security.....	1459
Principal Object.....	1460
Identity Object.....	1461

Table of Contents

Role-Based Security Checks.....	1462
The Roles Class.....	1466
Membership Feature.....	1484
ActiveDirectoryMembershipProvider	1484
SqlMembershipProvider.....	1485
The Membership Class.....	1487
MembershipUser Class.....	1487
Cryptography in .NET.....	1488
The System.Security.Cryptography Namespace	1489
Encryption and Decryption	1492
Hash Algorithms.....	1500
Immediate Solutions.....	1504
Managing Roles and Users	1504
Using Anonymous Authentication in ASP.NET	1510
Using Windows Authentication in ASP.NET	1513
Using Forms Authentication in ASP.NET.....	1522
Using Impersonation in ASP.NET Applications	1527
Creating User Using the Membership Class.....	1530
Validating and Retrieving a User.....	1535
Using the ItemUpdating Event.....	1539
Using Hash Algorithms.....	1548
Summary	1552

Part VII: Miscellaneous Topics

Chapter 31: Implementing Crystal Reports in ASP.NET 4.0	1553
In Depth.....	1554
Understanding Crystal Reports.....	1554
Crystal Reports Architecture.....	1555
The Embedded Crystal Reports Designer.....	1555
ReportViewer Controls	1557
Object Models.....	1557
Understanding Reporting Controls	1561
The ReportViewer Control	1561
The CrystalReportViewer Control.....	1563
The CrystalReportPartsViewer Control.....	1567
The CrystalReportSource Control.....	1568
Immediate Solutions.....	1570
Installing Crystal Reports.....	1570
Creating Crystal Reports by Using the CrystalReportViewer and CrystalReportSource Controls.....	1574
Creating Crystal Reports by Using the ReportViewer Control.....	1579
Creating Crystal Reports by Using the CrystalReportPartsViewer Control.....	1584
Customizing Crystal Reports.....	1592
Summary	1594

Chapter 32: Developing Mobile Applications	1595
In Depth	1596
.NET Compact Framework 4.0	1596
The Mobile Web Application Architecture	1597
Mobile Web Form Controls.....	1598
Adaptive Rendering.....	1599
Immediate Solutions	1600
Creating a Sample Mobile Web Application	1600
Summary	1608
Chapter 33: Deploying Web Applications	1605
In Depth	1610
Windows Installer Deployment	1610
Windows 7 Support	1610
Web Packaging.....	1611
Web.config Transformation.....	1611
Database Deployment	1612
One-Click Publish for Web Applications.....	1612
Deploying an Application using the Windows Installer Deployment Technique.....	1612
Distributable Media	1612
Web Setup Projects	1612
Cab File Projects	1613
XCOPY Deployment	1613
Advanced Options	1614
File System Editor	1614
Registry Editor	1615
File Types Editor	1615
User Interface Editor.....	1615
Custom Actions Editor.....	1616
Launch Conditions Editor.....	1617
Immediate Solutions	1618
Web Application Deployment	1618
Windows Installer.....	1618
XCOPY Deployment.....	1622
Copy Web Site Deployment	1623
Publishing a Web Site.....	1624
Deploying Web Site using the Web One Click Publish.....	1625
Summary	1626
Chapter 34: Online Travel Agency	1627
Project Requirements	1629
Software Requirements	1629
Basic Concepts of ASP.NET.....	1629
SDLC of Online Travel Agency portal.....	1629
The Requirement Analysis Phase	1629
The Software Design Phase	1630

Table of Contents

The Development Phase	1632
The Testing Phase	1632
The Implementation and Maintenance Phase	1632
Glossary	1633
Index	1653
What's on the CD-ROM	1669

Appendices on the CD

- Appendix A: Creating Business Objects**
- Appendix B: Implementing RSS and Atom Feed**
- Appendix C: Windows Presentation Foundation**
- Appendix D: Understanding IIS 7.5**
- Appendix E: Understanding Windows CardSpace**
- Appendix F: Understanding XML**
- Appendix G: Migrating Older ASP.NET Applications to ASP.NET 4.0**
- Appendix H: Introducing Cloud Computing**
