Table of Contents

Introduction xi

Chapter 1: Introduction to Software Engineering 1

1.1 Software Engineering: A Quick Review 2

1.2 Discussing Software Characteristics 2

1.3 Discussing Software Components 3

1.4 Discussig Software Applications 3

1.5 Exploring Layered Technologies 5

Process 5

Methods 5

Tools 6

1.6 Standard Observation of Software Engineering 6

1.7 Explaining Software Process 7

1.8 Exploring the Various Approaches for Software Development 11

Sequential Approach 11

Iterative Approach 11

Evolutionary Approach 11

1.9 Discussing the Various Categories of SDLC Processes 12

1.10 Introducing Software Development Process Models 13

1.11 Exploring Software Process Models 13

The Build and Fix Model 14

The Waterfall Model 14

The Transformation Model 16

The Rapid Application Development(RAD) Model 17

The Incremental Model 17

Evolutionary Development Model 18

Summary 22

Review Exercises 23

True or False 23

Multiple Choice Questions 23

Short Answers 24

Chapter 2: Requirements Engineering.....27

2.1 Requirement Engineering Process 28
2.2 Problem Recognition 29
2.3 Requirement Engineering Tasks 29
Requirements Gathering or Accumulation 30
Analyze Gathered Requirements 30
Review Gathered Requirements 30
Managing the Reviewed Requirements 31
2.4 Processes 31
2.5 Requirement Analysis 32
Data Flow Diagram 33
Entity-Relationship Diagram 34
2.6 Requirement Specification 35
Problems with Requirements 35
Types of Requirements 36
Identifying Requirements 36
System Requirements and Specifications 36
Requirements Determination 38
Requirement Identification Approach 38
Requirements Discovery 39
User Cases and Functional Specification 39
2.7 Requirement Validation 42
2.8 Modeling--Different Types 43
Analyzing the Problem Using a DFD 43
Analyzing the Problems Using a Context-Level Diagram 44
Analyzing the Problems Using a Data Dictionary 45
Analyzing Problem Using the Structured Analysis 45
Summary 46
Review Exercises 46
True/False 46
Multiple Choice Questions 46
Short Answers 48

Chapter 3: Structured System Design 51
3.1 Introducing Software Design 51
3.2 Exploring Design Concepts 52
Abstraction 53
Refinement 53
Structure 54
Modularity 54
Information Hiding 56
Functional Independence 56
Concurrency 58
Verification 59
Interface to Human Users 59
3.3 Exploring Design Model 60
3.4 Explaining Architectural Design 61
Explaining Software Architecture 63
Explaining the Guidelines for Good Architectural Decisions 63
Explaining Data Design 64
Exploring Architectural Styles and Patterns 65
Alternative Architectural Design 70
3.5 Explaining Component Level Design 71
Explaining Procedural Approach of Component Design 71
Explaining Object-Oriented Approach of Component Design 73
Summary 74
Review Exercises 75
True or False 75
Multiple Choice Questions 75
Short Answers 76

Chapter 4: Data-Oriented Analysis and Design 83
4.1 Difference between Data and Information 84
4.2 E-R Diagram 85
4.3 Data Flow Model 86
4.4 Control Flow Model 88
4.5 CSPEC and PSPEC 89
4.6 Data Dictionary 90
4.7 Data-Oriented Design 91

Summary 92
Review Exercises 93
True or False 93
Multiple Choice Questions 93
Short Answers 95

Chapter 5: User Interface Design 97
5.1 Concepts of UI 98
Human Factor 98
Interface Standards 98
Design Issues 99
Simplicity 100
Prevention and Suitability 101
5.2 Interface Design Models 101
5.3 Evaluation 102
5.4 Internal and External Designs 104
5.5 Interaction and Information Display Software 104
Summary 105
Review Exercises 106
True or False 106
Multiple Choice Questions 106
Short Answers 108

Chapter 6: Planning a Software Project 111
6.1 Exploring Software Project Planning 112
6.2 Exploring Project Estimation Techniques 114
6.3 Exploring Project Scope and Feasibility 115
6.4 Explaining Effort Estimation 116
Cost Models 116
COCOMO 117
Original COCOMO 117
6.5 Explaining Staffing and Scheduling 122
6.6 Explaining Quality Planning 124
6.7 Explaining Risk Management 125
6.8 Explaining Detailed Scheduling 126
Exploring the Gantt Chart 129

Exploring the PERT chart 130
Summary 131
Review Exercises 131
True or False 131
Multiple Choice Questions 132
Short Answers 133

Chapter 7: Quality Assurance 135

7.1 Explaining Software Quality Metrics 135
Identifying Effective Metrics 138
Classes of Software Metrics 138
Software Quality Metrics 139
7.2 Exploring Software Quality Management System 140
Quality Control 141
Quality Assurance 141
Total Quality Management 142
7.3 Explaining Cost of Quality 143
7.4 Exploring Software Review Techniques 145
Informal Review 146
Formal Technical Review 146
7.5 Explaining Software Quality Assurance 147
Approaches to Software Quality Assurance 149
Reliability 149
7.6 Exploring Quality Standards 150
ISO 9000 150
ISO 9001 151
Summary 153
Review Exercises 153
True and False 153
Multiple Choice Questions 154
Short Answers 155

Chapter 8: Coding and Unit Testing 157

8.1 Programming Principles and Guidelines 157
Structured Programming 158
Information Hiding 159
8.2 Programming Practices 160

8.3 Coding Standards 162
Advantages of Coding Standards 162
Types of Coding Standards 162
8.4 Incremental Development of Code 164
Incremental Coding Process 164
Test-Driven Development 165
Pair Programming 166
Agile Software Development 166
8.5 Code Management 166
Source Code Control System and Its Build Feature 167
Refactoring 168
8.6 Unit testing 170
Procedural Unit 171
Classes 172
8.7 Code Inspection 173
Planning 174
Self-Review 174
Group Review Meeting 175
8.8 Software Metrics 176
Size Metrics 177
Complexity Metrics 179
8.9 Comparison of Different Metrics 182
Summary 183
Review Exercises 183
True or False 183
Multiple Choice Questions 184
Short Answers 186

Chapter 9: Testing 189

9.1 Concepts of Testing 190
Error in Testing 190
Test Case 190
Stages of Testing 190
9.2 Psychology of Testing 191
9.3 Levels of Testing 192
Unit Testing 192

Integration Testing 194
Integration Testing Approaches 194
System Testing 195
Regression Testing 196
Acceptance Testing 196
9.4 Testing Process 197
Test Plan 199
Test Case Design 200
Test Execution 200
9.5 Black-Box Testing 201
Equivalence Partitioning 201
BVA 202
Pairwise Testing 202
State-Based Testing 203
9.6 White-Box Testing 203
Criteria of White-Box Testing 204
Test Case Generation 204
Tool Support 205
9.7 Metrics 205
Coverage Analysis 207
Reliability 208
Summary 208
Review Exercises 209
True or False 209
Multiple Choice Questions 209
Short Answers 211

Chapter 10: Software Project Management 213

10.1 Management Spectrum 214
People 214
Product 216
Process 217
Project 218
10.2 W5HH Principle 218
10.3 Importance of Team Management 219

Summary 220
Review Exercises 220
True or False 220
Multiple Choice Questions 221
Short Answers 222

Chapter 11: CASE Tools and Study 225

11.1 Introduction to CASE 225
Classification of CASE 226
Pros and Cons of CASE 229
11.2 Building Blocks of CASE 229
11.3 I-CASE Environment 231
Summary 233
Review Exercises 233
True or False 233
Multiple Choice Questions 234
Short Answers 236

Solved BE SEM-VI Examination May 2011 Paper 239

Index 259
