

Table of Contents

Introduction.....	xiii
Chapter 1: Computer Networking.....	1
1.1 Networking Applications.....	1
1.2 Networking Hardware	2
Network Interface Card (NIC)	2
Cables.....	3
Hub.....	4
Bridges.....	4
Routers	5
Repeaters	5
1.3 Network Topologies	6
Types of Network Topologies	6
Selection of Topology for Network Design	8
1.4 Network Software	9
1.5 OSI Reference Model.....	11
Physical Layer	12
Data Link Layer	12
Network Layer.....	13
Transport layer.....	13
The Session Layer.....	13
Presentation Layer.....	13
Application Layer.....	14
Summary.....	15
Self-Assessment Questions	15
Practical Exercise	15
Chapter 2: The Physical Layer.....	17
2.1 Guided Transmission Media	17
Twisted Pair Copper Cable.....	19
Coaxial Cable	20
2.2 Unguided Transmission Media.....	23
2.3 Wired and Wireless Transmission	24
2.4 The Mobile Telephone System.....	24
Call Management.....	25
Spectrum Efficiency	26
2.5 Practical LAN Card Overview	26
Auto Negotiation in the Network Card.....	27

Application of NIC Card	27
2.6 Hub and Switches	27
Switch	28
Summary	30
Self-Assessment Questions	30
Practical Exercise	30
Chapter 3: The Data Link Layer.....	31
3.1 Types of Networks at Data Link Layer.....	31
3.2 Services of Data Link Layer	32
3.3 Functions of Data Link Layer	33
3.4 Point to Point Protocol (PPP).....	33
Functions of Point to Point Protocol	34
Point-to-Point Protocol Frame	34
PPP Link-Control Protocol (LCP).....	35
Summary	36
Self-Assessment Questions	36
Practical Exercises.....	36
Chapter 4: Link Sharing Technologies	37
4.1 Rules Followed by Computer Network	38
4.2 Ethernet.....	38
Why Minimum Length of Frame is Required on Ethernet?.....	39
4.3 Media Access Protocols (MAC).....	40
Physical Properties of 10 mbps Ethernet	40
Transmitter Algorithm of MAC	41
Observation of Ethernet in Practice.....	41
Recommendations for Effective Use of Ethernet	41
4.4 Fast Ethernet.....	42
Physical Properties of Fast Ethernet (100 mbps)	42
4.5 Giga Bit Ethernet	43
Physical Properties of Gigabit Ethernet (1000 mbps)	44
Autonegotiation.....	45
4.6 Wireless LAN MAC.....	45
4.7 Practical Selection of Wireless Cards	45
Local Wireless Network Design.....	46
Wide Area Radio Network Design Issues	46
Summary	47
Self-Assessment Questions	47
Practical Exercises.....	47

Chapter 5: Addressing Mechanism in Internet.....	49
5.1 The ipconfig Command	49
5.2 Why physical address is not sufficient on the Internet?.....	51
5.3 IP Addresses on Internet	51
Summary.....	53
Self-Assessment Questions	53
Practical Exercises.....	54
Chapter 6: The Network Layer	55
6.1 IP Addressing	55
6.2 IP Address Classes	56
Class A IP Address.....	56
Class B IP Address.....	58
Class C IP Address.....	60
Class D IP Address	60
Class E IP Address.....	61
6.3 Classless IP Addressing	61
6.4 Subnetting.....	61
6.5 Supernetting	63
6.6 IP Protocol.....	63
6.7 ICMP Protocol.....	67
Summary.....	67
Self-Assessment Questions	68
Practical Exercises.....	68
Chapter 7: Transport Layer	69
7.1 Significance of Transport Layer.....	70
7.2 Exploring the User Datagram Protocol(UDP)	70
Exploring Error Control in UDP.....	73
UDP Pseudo-Header.....	73
Encapsulation and Decapsulation in UDP.....	74
Calculating the Checksum Field of a Datagram.....	76
7.3 Understanding Multiplexing, Demultiplexing, and Ports in UDP.....	77
7.4 Transmission Control Protocol (TCP)	77
Learning the Features of TCP	80
Understanding the Concept of Sliding Windows	83
Using Segments, Streams, and Sequence Numbers in Transfer of Segments	85
Learning Variable Window Size, Flow Control, and Out of Sequence Urgent Data.....	85
Learning MSS and Optimum Size of Segment.....	87
Computing Checksum Field of a Segment.....	87
Learning about Acknowledgement of Segments	88
Understanding Timeout and Retransmission of Segments	88

x ► Table of Contents

7.5	Understanding the TCP Connection	89
	Establishing a TCP Connection	90
	Terminating a TCP Connection.....	91
	Resetting a TCP Connection	92
7.6	Difference between TCP and UDP Protocols.....	92
7.7	Congestion Control.....	92
	Congestion Policy	93
	Slow Start.....	93
	Congestion Avoidance.....	93
	Congestion Detection.....	93
	Summary.....	93
	Self-Assessment Questions	94
Chapter 8: Network Programming.....		95
8.1	Socket Calls	96
8.2	TCP Client Server Programming.....	96
8.3	Compiling and Execution of Server Program.....	98
8.4	Compiling and Execution of Client Program.....	100
8.5	UDP Client Server Programming	101
8.6	IP Layer Programming	104
8.7	Ping Implementation	104
	Summary.....	107
	Self-Assessment Questions	107
	Practical Exercises.....	107
Chapter 9: The Application Layer		109
9.1	Domain Name System.....	109
	Flat Namespaces	110
	Hierarchical Namespaces.....	110
	The DNS Namespace.....	110
	Name Servers.....	111
	Domain Name Resolution	111
9.2	Remote Login Using TELNET	112
	Remote Interactive Computing	112
	TELNET Protocol.....	112
	Accommodating Heterogeneity.....	113
	TELNET Options and Negotiation	114
9.3	File Transfer and Access using FTP.....	114
	Understanding FTP.....	116
	Trivial File Transfer Protocol.....	117
9.4	Electronic-Mail.....	118
	TCP/IP Standards for E-Mail	119

Simple Mail Transfer Protocol.....	120
Post Office Protocol and Internet Message Access Protocol	122
Summary.....	124
Self-Assessment Questions	124
Chapter 10: Cryptography and Network Security	125
10.1 Understanding Cryptography	126
10.2 Basic Terms.....	127
10.3 Ancient Cryptography.....	127
10.4 Classical Ciphers	128
Atbash Cipher	128
Scytale.....	128
Caesar Cipher.....	129
Book Cipher	129
Beale Ciphers	130
Enigma	130
Cryptology	130
Kirchhoff's Principle.....	131
Strength of Cryptosystem	131
10.5 Encryption.....	131
Symmetric Key Cryptography	131
Key Distribution Problem	131
Key Management Problem.....	132
Asymmetric Key Cryptography	132
10.6 Processes in the Encryption.....	132
Transposition.....	133
Substitution	133
10.7 Stream Cipher.....	138
One-Time Pad.....	138
Conditions on OTP Usage.....	138
Types of Attack on Cryptographic Algorithms.....	138
10.8 Data Encryption Standard (DES)	139
DES Algorithm	139
10.9 Steganography.....	146
Steganography and Cryptography.....	147
Basic Terms in Steganography	148
Challenges of Steganography	148
Steganography Applications	148
Steganalysis and Cryptanalysis	149
Statistical Analysis.....	149
10.10 Cryptanalysis	149
Impact of Cryptanalysis.....	150

Classical vs. Modern Cryptanalysis	150
Types of Attacks	150
MITM Attack Countermeasures	152
10.11 Linear Cryptanalysis	153
10.12 Differential Cryptanalysis	153
Birthday Attack	153
Side Channel Attacks	154
10.13 Cryptanalysis of Caesar Cipher	154
Manual Substitution	154
10.14 Frequency Analysis	154
10.15 Modern Cryptanalysis	154
10.16 Hashing	155
Tradeoffs in Compression	156
Types of Compression	156
One-Way Hash	156
Cryptographic Hash Function	156
Secure Hash Algorithm (SHA)	157
Applications of Hashing	159
10.17 Impact of Computers on Cryptography	159
10.18 Applications of Cryptography	160
10.19 Network Layer Security	160
Tunnel Mode of IPSec	161
Summary	162
Self-Assessment Questions	163
Practical Exercises	163
Index	165
