Microsoft

Windows Phone 8 Development Internals

Andrew Whitechapel
Sean McKenna

Phone_8_Dev_Internals.indb 1 6/10/13 5:49 PM

Contents at a Glance

	Foreword	*xxiii*
	Introduction	*xxv*
PART I	**CORE FEATURES**	
CHAPTER 1	Vision and architecture	3
CHAPTER 2	App model and navigation	33
CHAPTER 3	UI visuals and touch	77
CHAPTER 4	Data binding and MVVM	139
CHAPTER 5	Phone and media services	187
CHAPTER 6	Sensors	233
CHAPTER 7	Web connectivity	273
CHAPTER 8	Web services and the cloud	315
CHAPTER 9	Background agents	349
CHAPTER 10	Local storage and databases	395
PART II	**WINDOWS PHONE 7 TO WINDOWS PHONE 8**	
CHAPTER 11	App publication	439
CHAPTER 12	Profiling and diagnostics	467
CHAPTER 13	Porting to Windows Phone 8 and multitargeting	509
CHAPTER 14	Tiles and notifications	539
CHAPTER 15	Contacts and calendar	587
CHAPTER 16	Camera and photos	621
CHAPTER 17	Networking and proximity	667
CHAPTER 18	Location and maps	707
PART III	**NEW WINDOWS PHONE 8 FEATURES**	
CHAPTER 19	Speech	753
CHAPTER 20	The Wallet	785
CHAPTER 21	Monetizing your app	811
CHAPTER 22	Enterprise apps	845

PART IV NATIVE DEVELOPMENT AND WINDOWS PHONE 8 CONVERGENCE

CHAPTER 23 Native development 867
CHAPTER 24 Windows 8 convergence 901
CHAPTER 25 Games and Direct3D 933

Index *965*

Phone_8_Dev_Internals.indb 6 6/10/13 5:49 PM

Contents

Foreword . . . . . *xxiii*
Introduction . . . . . *xxv*

PART I CORE FEATURES

Chapter 1 Vision and architecture 3

A different kind of phone 3
The user interface 4
The role of apps 6
Windows phone architecture 8
Platform stack 8
App types 9
Background processing 11
Security model 13
Windows and Windows Phone: together at last 16
Building and delivering apps 18
Developer tools 18
App delivery 20
Getting started with "Hello World" 21
Creating a project 22
Understanding the project structure 24
Greeting the world from Windows Phone 27
Deploying to a Windows Phone device 29
The Windows Phone Toolkit 29
Summary 31

What do you think of this book? We want to hear from you!
Microsoft is interested in hearing your feedback so we can continually improve our books and learning resources for you. To participate in a brief online survey, please visit:

Phone_8_Dev_Internals.indb 7 6/10/13 5:49 PM

Chapter 2 App model and navigation 33

The app lifecycle 34
Normal termination 37
App deactivated—fast app resume 37
App deactivated—the tombstone case 38
Setting a resume policy 43
Obscured and *Unobscured* *45*
The page model 47
Page creation order 49
Navigation and state 52
App state 53
Page state 56
Cancelling navigation 59
Backstack management 60
Navigation options 63
Using *NavigateUri* 64
Pages in separate assemblies 64
Fragment and *QueryString* *65*
The *NavigationMode* and *IsNavigationInitiator* properties 68
Re-routing navigation and URI mappers 70
File type and URI associations 72
Starting an app based on a file or URI 72
Acting as a file type or URI handler 73
Summary 76

Chapter 3 UI visuals and touch 77

Phone UI elements 77
Standard UI elements 77
The visual tree 81
Screen layout 84
Working with *UserControls* vs. custom controls 89
Re-templating controls 92

Phone_8_Dev_Internals.indb 8 6/10/13 5:49 PM

Resources 94
Data resources 94
XAML resources and resource dictionaries 95
Implicit styles 99
Dependency and attached properties 101
Dependency properties 101
Attached properties 104
The app bar and notification area 108
Transient panels 113
Routed events 121
Logical touch gestures 124
Manipulation events 126
Mouse events 132
FrameReported events 133
Keyboard input 135
Summary 137

Chapter 4 Data binding and MVVM 139

Simple data binding and *INotifyPropertyChanged* 139
Data-binding collections 147
Dynamic data-bound collections 150
Command binding 153
Template resources 157
Sorting and grouping bound collections 158
Type/value converters 161
Element binding 164
Data validation 165
Separating concerns 171
The Model-View-ViewModel pattern 174
The Visual Studio databound application project 175
MVVM in Pivot apps 180

Phone_8_Dev_Internals.indb 9 6/10/13 5:49 PM

Row filtering in Pivot apps 182
Improving the Visual Studio Databound Application template. . . 184
Summary. 186

Chapter 5 Phone and media services 187

Launchers and Choosers 187
Search extensibility. 192
App Connect. 193
App Instant Answer 200
Audio and video APIs. 202
Media playback 203
The *MediaPlayerLauncher*. *203*
The *MediaElement* class 204
The *MediaStreamSource* and *ManagedMediaHelpers* classes 205
The *MediaElement* controls 207
Audio input and manipulation 211
The *SoundEffect* and *SoundEffectInstance* classes 211
Audio input and the microphone 214
The *DynamicSoundEffectInstance* class 223
Music and Videos Hub 227
The Clipboard API. 230
Summary. 232

Chapter 6 Sensors 233

Orientation 233
Phone hardware 236
Sensor APIs. 237
The accelerometer 238
Reactive extensions 242
The Level Starter Kit. 245
Shake 252
Compass 256

Phone_8_Dev_Internals.indb 10 6/10/13 5:49 PM

Gyroscope 261
Motion APIs 266
Summary 271

Chapter 7 Web connectivity 273

The *WebClient* and *HttpWebRequest* classes 273
Using the async pack 278
Using the Task Parallel Library 280
The *WebBrowser* control 281
Local webpages 282
Integrating with JavaScript 284
Live SDK 287
SkyDrive 290
Facebook 294
Twitter 300
The Data Sense feature 312
Summary 314

Chapter 8 Web services and the cloud 315

Web services 315
Localhost and the emulator 317
Connecting to the web service 321
SOAP vs. REST 323
WCF data services 325
Creating an OData client 326
Filtered queries 329
Dynamic query results 331
Paging the data 332
Caching the data 333
JSON-formatted data 337
Web service security 339

Phone_8_Dev_Internals.indb 11 6/10/13 5:49 PM

Windows Azure 340
Windows Azure web services 341
Windows Azure Mobile Services for Windows Phone 345
Summary 348

Chapter 9 Background agents 349

Background tasks 349
Alarms and reminders 350
Alarms 351
Reminders 354
The Background Transfer Service 358
Generic Background Agents 362
GBA components 366
Updating tiles 373
The lock-screen background 378
Lock-screen notifications 382
Background audio 384
Background audio application 388
Background audio agent 392
Summary 394

Chapter 10 Local storage and databases 395

Local storage 395
Isolated storage APIs 395
Windows Runtime storage 402
Win32 APIs 407
LINQ-to-SQL 411
Defining the database in code 412
Performing queries 416
Create/update/delete 416
Associations 418
Handling schema changes 423
Prepopulating a reference database 427
Maximizing LINQ-to-SQL performance 431

Phone_8_Dev_Internals.indb 12 6/10/13 5:49 PM

SQLite 434
Acquiring SQLite for Windows Phone 435
Using SQLite from managed code 436
Summary. 436

PART II WINDOWS PHONE 7 TO WINDOWS PHONE 8

Chapter 11 App publication 439

Preparing for publication 439
The publication process. 443
Dev Center reports 452
Updates. 454
Beta testing 458
Versions. 459
Selective targeting 460
Device capabilities 460
Device memory 463
Summary. 466

Chapter 12 Profiling and diagnostics 467

Debugging 467
Targeting different device configurations 467
Troubleshooting app startup 468
Using Fiddler with the Windows Phone emulator 468
Testing. 472
Unit testing 472
Simulating real-world conditions 481
Testing tombstoning 485
The Windows Phone emulator 486
Profiling 487
Frame rate counters. 488
Redraw regions. 490
DeviceStatus Memory APIs. 491

Phone_8_Dev_Internals.indb 13 6/10/13 5:49 PM

The Windows Phone Performance Analysis Tool 493
Profiling native code 502
Performance best practices 503
Keep the user engaged 504
Stay off of the UI thread 504
Simplify the visual tree 505
Easy wins with photos 506
Use *LongListSelector* instead of *ListBox* for large collections 506
Use panorama thoughtfully 507
Summary 508

Chapter 13 Porting to Windows Phone 8 and multitargeting 509

Lighting up a Windows Phone 7 App with Windows Phone 8 features 509
Creating Windows Phone 8 tiles in a Windows Phone 7 App 510
Quirks mode and breaking changes 520
Quirks mode 520
Breaking changes 521
Managing platform-specific projects 528
Create distinct apps for Windows Phone 7.1 and Windows Phone 8 529
Share a Windows Phone 7.1 library 530
Link source code files 531
Create abstract base classes and partial classes 534
Windows Phone 7.8 SDK 536
Test coverage for Windows Phone 7.x apps 537
Summary 538

Chapter 14 Tiles and notifications 539

Tile sizes and templates 539
Secondary tiles 546
Pinning tiles 550
Cross-targeting Windows Phone 7 557

Phone_8_Dev_Internals.indb 14 6/10/13 5:49 PM

Push notifications 558
Push notification server 561
Push notification client 565
Registration web service 569
Additional server features 573
Batching intervals 574
XML payload 575
Response information 576
Additional client features 576
The *ErrorOccurred* event 576
User opt-in/out 578
Implementing a push viewmodel 579
Push notification security 584
Summary 585

Chapter 15 Contacts and calendar 587

Contacts 587
Understanding the People Hub 587
Querying device contacts 590
Adding contact information 602
Creating a custom contacts store 605
Calendar 614
Querying the calendar 614
Creating a new appointment 618
Summary 619

Chapter 16 Camera and photos 621

Acquiring a single photo 621
Working with the media library 624
Reading photos 624
Adding new images 629

Phone_8_Dev_Internals.indb 15 6/10/13 5:49 PM

Capturing photos 633
The *PhotoCamera* class 634
The *PhotoCaptureDevice* class (Windows Phone 8 only) 639
Extending the Photos Hub 649
Apps pivot 650
The photo apps picker and photo edit picker 651
Lenses 655
Launching from the camera 656
Rich media editing 659
Sharing photos 661
Share picker 661
Auto-upload 662
Summary 665

Chapter 17 Networking and proximity 667

Sockets 667
The Windows Runtime sockets API 668
.NET sockets 675
The WinSock API 680
Finding your app on nearby devices 680
Finding peers through Bluetooth 683
Finding peers through tap-to-connect 686
Reconnecting without retapping 689
Tap-to-connect with a Windows 8 app 694
Connecting to other Bluetooth devices 695
NFC 696
Reading and writing NFC tags 697
Sending a URI across devices 702
Summary 705

Phone_8_Dev_Internals.indb 16 6/10/13 5:49 PM

Chapter 18 Location and maps **707**

Architecture 707

Determining the current location (Windows Phone 7) 708

Bing maps (Windows Phone 7) 712

The Bing *Map* control 712

Bing maps web services 716

Bing Maps Launchers 720

Getting location (Windows Phone 8) 722

Maps API (Windows Phone 8). 727

The *Map* control. 727

Route and directions 734

Maps Launchers 739

Continuous background execution (Windows Phone 8) 741

Testing location in the simulator 747

Location best practices 748

Summary. 749

PART III NEW WINDOWS PHONE 8 FEATURES

Chapter 19 Speech **753**

Voice commands. 753

The GSE 754

Building a simple voice commands App 756

Updating *PhraseList*s at run time 766

Speech recognition in apps. 767

Simple recognition with built-in UX 767

Customizing the recognizer UI 769

Adding custom grammars 770

Text-to-Speech 776

Simple TTS with *SpeakTextAsync* 777

Taking control with speech synthesis markup language. 777

Phone_8_Dev_Internals.indb 17 6/10/13 5:49 PM

Putting it together to talk to your apps 781
Summary. 784

Chapter 20 The Wallet 785

Understanding the Wallet 785
The Wallet and Near Field Communication 785
The Wallet Hub 786
The Wallet object model 787
Managing deals 787
Transaction items 796
Payment instruments. 806
Wallet agents 806
Summary. 809

Chapter 21 Monetizing your app 811

Advertising 811
Integrating the Ad Control 812
Ad Control design guidelines. 816
Registering with Microsoft pubCenter 819
Trial mode. 823
In-app purchase 829
Division of responsibilities 830
Types of IAP content 831
Configuring the mock IAP library 832
Purchasing durable content 835
Purchasing consumable content 840
Configuring IAP inventory 841
Summary. 844

Phone_8_Dev_Internals.indb 18 6/10/13 5:49 PM

Chapter 22 Enterprise apps **845**

Windows Phone for business 845

Managed vs. unmanaged phones 847

MDM and managed phones 847

Managed enrollment. 847

Unmanaged phones. 849

Unmanaged enrollment 850

Company Apps 855

Building a company hub app 856

Summary. 863

PART IV NATIVE DEVELOPMENT AND WINDOWS PHONE 8 CONVERGENCE

Chapter 23 Native development **867**

Native code overview. 867

When to use native code 868

An introduction to modern C++ 869

Smart pointers 869

Foreach loops 872

Lambdas. 872

Scoped, strongly typed *enum*s 874

What about properties and events? 875

Managed-native interop 878

Creating the Windows Runtime component. 880

Consuming the Windows Runtime component from C# 885

Debugging mixed-mode projects. 888

Writing asynchronous code in C++ 888

Moving synchronous code to the background. 889

Providing progress updates 890

Cancelling asynchronous operations 892

Phone_8_Dev_Internals.indb 19 6/10/13 5:49 PM

Using Windows Runtime classes in C++ 896
Win32 API 898
Component Object Model (COM) 899
Supported platform COM libraries 899
Using custom COM libraries 900
Summary 900

Chapter 24 Windows 8 convergence 901

Windows 8 and Windows Phone 8 compared 901
Developer tools and supported languages 902
Application models 903
Frameworks 904
Background processing 909
Authoring Windows Runtime components on Windows Phone . . 911
Sharing code between Windows and Windows Phone 911
Deciding when and how to share code 911
Code sharing and Model-View-ViewModel 913
Sharing .NET code by using the PCL 914
Linked files and conditional compilation 919
Sharing managed code with partial classes 922
Sharing native code 924
Sharing XAML-based UI with user controls 927
Summary 932

Chapter 25 Games and Direct3D 933

Direct3D primer 933
Direct3D differences on Windows Phone 935
Visual Studio project types 936
Direct3D and XAML projects 937

Phone_8_Dev_Internals.indb 20 6/10/13 5:49 PM

Structure of the basic Direct3D app 940
The *CoreApplication* and *CoreWindow* classes 940
Starter code classes 941
Initializing Direct3D 945
A brief word about the Component Object Model 946
DirectX hardware feature levels 949
Update and render 950
Minimal Direct3D app 954
Touch input 959
Direct2D and DirectXTK 961
Summary 964

Index *965*
