Introduction.....	xi
<b>Chapter 1: Concept and Overview DDB System.....</b>	<b>1</b>
1.1 Distributed Database System .....	2
1.2 Features of DDBS.....	3
1.3 Difference between Centralized DBMS and DDBS .....	3
1.4 Functionality of DDBS.....	5
1.5 Promises of DDBS.....	5
1.6 Design Issue in DDBS.....	6
1.7 Centralized versus Non-Centralized Databases .....	6
1.8 Homogeneous and Heterogeneous DDBS and Their Comparison .....	8
1.9 Architecture of DDBS .....	10
Client-Server DDBS Architecture .....	10
Peer-to-Peer Architecture.....	12
Multi-Database System Architecture.....	13
Summary.....	17
Review Exercise .....	17
Multiple Choice Questions .....	17
Subjective Questions.....	20
<b>Chapter 2: Distributed Database Design .....</b>	<b>27</b>
2.1 Distributed Database Design Concept .....	27
2.2 Objectives of Data Distribution.....	29
2.3 Replication of Data.....	30
2.4 Data Fragmentation .....	31
Horizontal Fragmentation.....	31
Vertical Fragmentation.....	32
Mixed Fragmentation .....	33
Hybridization (Combination of Both Replication and Fragmentation) of Data.....	35
2.5 The Allocation of Fragments .....	35

Measure of Costs and Advantages for Fragment Allocation.....	36
2.6 Transparencies in Distributed Database Design .....	38
Network Transparency .....	39
Replication Transparency .....	39
Fragmentation Transparency .....	39
Summary.....	40
Review Exercise .....	40
Multiple Choice Questions .....	40
Subjective Questions.....	42
<b>Chapter 3: Distributed Transaction and Concurrency Control .....</b>	<b>47</b>
3.1 Introducing Transactions.....	48
3.2 Basic Concept of Transaction Management .....	49
3.3 The ACID Properties.....	51
Atomicity .....	52
Consistency.....	52
Isolation .....	54
Durability.....	56
3.4 State of Transaction.....	56
3.5 Objectives of Distributed Transaction Management.....	57
3.6 Model for Transaction Management.....	58
3.7 Objective of Distributed Concurrency Control.....	60
3.8 Concurrency Control Anomalies.....	61
Lost Update .....	63
Dirty Reads .....	64
Unrepeatable Reads .....	65
Inconsistency Analysis .....	65
3.9 Concurrency Control Methods.....	66
Single-Lock Manager Approach.....	66
Distributed Lock Manager Approach .....	66
3.10 Serializability and Recoverability .....	68
Defining Serializability .....	68
Serial Schedule .....	69

---

Conflict Serializability .....	70
View Serializability .....	73
Precedence Graph and Serializability .....	74
3.11 Distributed Serializability .....	76
3.12 Enhanced Lock-Based and Timestamp-Based Protocols .....	79
Lock-Based Protocol .....	79
Two-Phase Locking Protocol .....	84
Timestamp-Based Protocol .....	88
3.13 Multiple Granularity .....	91
Multiple-Granularity Locking Protocol .....	92
3.14 Multi-Version Schemes .....	95
Multi-Version Timestamp-Based Protocol .....	96
Multi-Version 2PL Protocol .....	97
3.15 Optimistic Concurrency Control Techniques .....	98
Summary .....	101
Review Exercise .....	101
Multiple Choice Questions .....	101
Subjective Questions .....	103
<b>Chapter 4: Distributed Deadlock and Recovery .....</b>	<b>113</b>
4.1 Introduction to Deadlock .....	114
Causes of Deadlock .....	115
4.2 Distributed Deadlock Management .....	116
Distributed Deadlock Detection .....	116
Distributed Deadlock Prevention .....	119
Distributed Deadlock Avoidance .....	120
The Distributed Wait-Die Algorithm .....	121
The Distributed Wound-Wait Algorithm .....	123
4.3 Recovery in DBMS .....	125
Recoverability .....	125
Types of Failure .....	126
Methods to Control Failures .....	128
Different Techniques of Recoverability .....	128

4.4	Write-Ahead Logging Protocol .....	134
4.5	Advanced Recovery Techniques .....	135
	Shadow Paging.....	135
	Fuzzy Checkpoints.....	137
	ARIES.....	137
4.6	Use of SQL in Recovery.....	140
4.7	RAID.....	141
	RAID 0.....	142
	RAID 1.....	143
	RAID 3.....	144
	RAID 4.....	145
	RAID 5.....	146
	RAID 6.....	147
4.8	Two-Phase and Three-Phase Commit Protocols .....	148
	Two-Phase Commit Protocol.....	149
	Three-Phase Commit Protocol.....	151
	Difference between 2PC and 3PC .....	152
	Summary.....	153
	Review Exercise .....	154
	Multiple Choice Questions .....	154
	Subjective Questions.....	156
<b>Chapter 5: Distributed Query Processing and Optimization.....</b>		<b>163</b>
5.1	Concept of Distributed Query Processing .....	163
5.2	Objectives of Distributed Query Processing .....	170
5.3	Phases of Distributed Query Processing.....	172
	Query Decomposition.....	173
	Query Fragmentation .....	182
	Global Query Optimization .....	189
	Local Query Optimization .....	196
3.5	Join Strategies in Fragmentation Relation .....	198
	Simple Join Strategy .....	198
	Semijoin Strategy.....	199

---

Summary.....	200
Review Exercise .....	200
Multiple Choice Questions .....	200
Descriptive Questions .....	202
<b>Chapter 6: Heterogeneous Database.....</b>	<b>213</b>
6.1 Architecture of Heterogeneous Database .....	214
6.2 Homogeneous Distributed Database Systems.....	216
6.3 Homogeneous and Heterogeneous DDBMS and Their Comparison .....	217
6.4 Heterogeneous Distributed Database Functionalities.....	218
Integrated Schemas .....	219
Distributed Query Management .....	220
Distributed Transaction Management.....	220
Administration .....	222
Types of Heterogeneity .....	223
6.5 Standards Activities in Development of Heterogeneous Systems .....	223
ADDS (Amoco Production Company, Research).....	224
DATAPLEX (General Motors Corporation).....	228
IMDAS (National Institute of Standards and Technology, U. Florida) ...	234
INGRES (Ingres Corporation).....	239
Ingres/STAR System Characteristics .....	239
6.6 Data Integration .....	248
Schema Mapping or Translation.....	249
Schema Integration.....	249
Query Optimization in Heterogeneous Database .....	252
Summary.....	253
Review Exercise .....	253
Multiple Choice Questions .....	253
Subjective Questions.....	255

<b>Chapter 7: XML</b> .....	<b>261</b>
7.1 Exploring XML.....	262
Exploring Advantages and Disadvantages of XML.....	264
Benefits of Storing XML Data in SQL Server .....	264
7.2 XML for Data Integration.....	265
7.3 Structure of XML .....	266
Exploring XML Declaration .....	267
Exploring XML Elements.....	268
Exploring XML Attributes.....	270
Exploring an XML Tree.....	270
Exploring XML Comments.....	271
7.4 Exploring XML Entity References .....	271
7.5 Creating an XML Document .....	272
7.6 Defining XML Attributes .....	273
7.7 Creating an XML Tree.....	274
7.8 Working with XML Comments .....	276
7.9 Defining XML Entity References .....	278
7.10 Exploring XML Parsers .....	279
7.11 Working with XML Parsers .....	279
7.12 XML Document Schema.....	282
Describing DTD .....	282
Working with DTD.....	288
Describing an XML Schema .....	293
Understanding the Simple Type Element.....	294
7.13 Querying and Transformation.....	309
Tree Model of XML .....	310
The XPath Language.....	310
The XQuery Language .....	313
7.14 Storage of XML Data .....	315
Non-Relational Data Stores.....	315
Relational Databases.....	315

7.15 XML Application .....	316
Summary.....	318
Review Exercise .....	319
Multiple Choice Questions .....	319
Subjective Questions.....	321
<b>Case Studies .....</b>	<b>325</b>
Distributed Database System: Case Study-I.....	327
Distributed Database System: Case Study-II .....	345
<b>Index .....</b>	<b>353</b>
